to GROW

J. F. Sinn, president and general manager, is an Iowa product. He was born and raised on a Page County farm, and has been associated with the Berry Seed Company since 1905. It is under his direction that our company has attained its position of leadership as the largest seed house in the world selling farm seeds direct to farmers. You have him to thank for the great farm seed values found in this book. He is a great friend of the farmer, and has a personal acquaintance with thousands of them. You may often hear him over our Radio Station at 6:30 in the morning.

The President's GUARANTEE

AND PERSONAL ANNIVERSARY INVITATION

Dear Friend: I want everyone receiving this Anniversary catalog to understand that when you buy seeds from the Berry Seed Company you are dealing with an old established seed house. I personally will guarantee to save you money and absolute satisfaction with any seed purchased from this Anniversary Sale. I am going to give you 60 days to have the seed tested and to satisfy yourself you have saved money. At the end of that time if you do not consider that you have the greatest bargain you can find, return the seed and we will refund you the price paid plus the freight or express paid on the shipment. I want everyone buying seed from this Anniversary Sale catalog to have the utmost confidence in their purchases. I know the values and savings offered are genuine. I know that you cannot help but be pleased after the shipment arrives. This is the reason we make such a liberal sweeping guarantee.

I want you to read this catalog from front to back. You will find bigger and better bargains in it than you ever thought possible. You will find the Berry Seed Company one of the finest Mail Order Houses that you ever did business with, for we give our customers every consideration and treat them in the fairest manner possible. I don't know how to convince you of these statements, except to invite you to send us an order and see for yourself.

Our bank references are sufficient proof of our responsibility. I have printed a few letters from customers who buy every year from us. If I could talk with you just a few minutes I know you would want to buy your seeds from us. Our prices are so much lower and the bargains so outstanding in this Anniversary catalog that you cannot afford to pass them by without ordering.

Seed Crops are wonderful. Quality unexcelled and prices the lowest they have been for 9 years. Now is the time to sow seed abundantly and build up the worn farms that have been depleted. Both Clover and Alsike are reduced in price almost a half. Sweet Clover is again cheap, Timothy slightly higher, but mixtures are cheaper than last year. This catalog comes to you at a time when we can save you most, as our prices are all based on early purchases and lower markets. The Berry Seed Company never offered the seed buyer such a golden opportunity to buy seed at such low prices.

We are celebrating our 35th anniversary in business by issuing this Cut Price Sale catalog. We hope to add a hundred thousand new customers to our Seed Family. If you need seeds or nursery stock of any kind we want you to join us. I want to give you a personal invitation to join our Anniversary celebration by sending an order. If you will accept, I will reward you with an Anniversary gift. You can make your own selection of the gift and I will guarantee that you save money and that everything will be satisfactory. I want you to respond and become acquainted with me.

Yours faithfully,

J. F. Sinn.

A Customer for 24 Years

Nov. 9, 1928.

Gentlemen: I have been buying seeds from Berry for 24 years. I have lately club ordered my seeds, including my farmer friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4 to \$7 per bu. by ordering from you. I expect to save even more this year as all kinds of seed are scarce due to bad winter last year. I find you people honest to do business with and your World Brand the very best buy. Your money back if not satisfied.—J. W. Gerhardt, New Berlin, Illinois.

Edwardsville, Ill.,

Nov. 25, 1929.

Dear Sir: I have bought seed from you for several years and find them to be O.K. both in quality and germination. Also at real money saving prices. Yours truly,

H. C. Strasen.

germination. Also at real money saving prices. Yours truly,

Hall, West Virginia.

Dear Sirs: I have been buying seeds from you for a number of years for my own use and the Boulder Farm Club. The seeds have always given entire satisfaction, and we have saved over One Hundred Dollars by ordering from you. Very truly yours, Ira L. Dadisman.

My Dear Sirs: Having bought several thousand dollars worth of seed from the Berry Seed Company in the past few years, have always found them prompt, strictly straight and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination that gave entire satisfaction all around. D. W. Harris, Greens Fork, Ind.

Dear Sirs: We buy seeds for our farms from Berry Seed Co.; some years the bill runs over \$1,000. The quality of the seed holds us as a customer, then, too, the price is always less. Yours truly, Raymond C. Langan, Clinton, Iowa.

**Our
Capital and
Surplus \$800,000.00**

The phenomenal success of the Berry Seed Company at this time is largely due to the great amount of capital invested in the business and the unlimited amount of credit available. We are in position to go into the markets at the most favorable times and buy our seeds to the very best advantage on account of having the ready cash to plunk down for them. Our capital enables us to buy special bargains, as many seedsmen become hard pressed for ready cash and are compelled by their banker to sell and we are offered these opportunities as the seed trade generally know that we are always in the market and awaiting any real snaps that are to be had.

These distressed cars we have snapped up from time to time, make these splendid bargains possible for our Anniversary Sale. Hardly a week goes by without we have the opportunity of buying a car or two of seed at a real sacrifice price owing to some seedsmen having to turn seed sometimes considerably under the market and its real worth.

VERY LARGE DEALERS

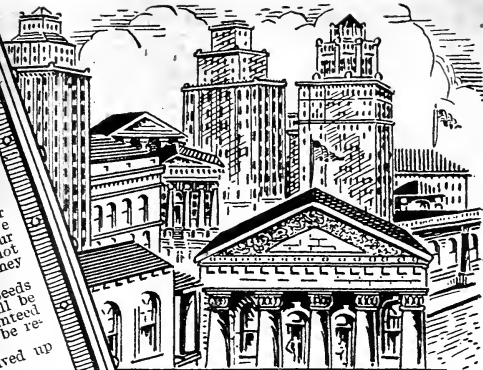

We know markets and what our trade demands, so being on the alert gives us an untold advantage over our competitors who in many cases are dividing their time in other lines of business and are not so well posted on the seed game. We are recognized as specialists in farm and grass seeds. We have sold as many as 150 carloads of Sweet Clover in a single year. We are large handlers and have built up this phenomenal business by turning our seeds on a very close margin. Our profits are never large, but the volume of our sales reaches into the millions. When you accept our Anniversary Invitation and become one of our customers you can then appreciate our Service and unequal values.

SUPERIOR CLEANING FACILITIES

Another most important factor in the producing of high grade seeds is the cleaning equipment. We have some of the finest cleaners known to the seed industry, the latest improved scarifier, polisher and graders, so as to refine our seed to the highest possible quality. Our superintendent of the cleaning department is an expert and does work in the way of purifying seed that is almost unbelievable. When buying seed from the country, it is necessary to be well equipped to clean and grade the seed up properly. This is where we shine, as we have had the experience in cleaning as well as the facilities. Our grades are most satisfactory and if seed does not clean up into the highest quality, it is not acceptable for our World Brand.

SEEDS OF KNOWN ORIGIN

There is another advantage of buying your Seeds direct from the Berry Seed Company, for we know in most cases the origin of all the seed we sell. When we buy seeds direct from the producer there is no question about its origin. Our test tags placed on the bag, in nearly every case, gives you the state in which the seed was grown. All of our Alfalfa is of U. S. Verified Origin, giving our customers this added security in knowing where the seed was grown.

TESTED AND GUARANTEED SEEDS

Every lot shipped should carry our test tag, giving the purity, germination, percentage of weed seed and inert matter according to the Iowa State Seed Law. We are very careful to have every sample coming to the office tested before buying, protecting the interest of our customers by eliminating lots containing dangerous weed seed.

Our laboratory is one of the busiest places during our buying and shipping season. Our Mr. L. C. Jorgenson (picture above) is highly trained, having taken special seed training under the supervision of the Bureau of Plant Industry, Washington, D. C. He is recognized as one of the most capable analysts in this part of the country.

When you buy your seeds from the Berry Seed Company you know they have been carefully tested. You know you are dealing with an old established seed house, and you know everything is guaranteed and must be satisfactory. Your trust and confidence placed in the Berry Seed Company at the time of ordering will be most securely safeguarded and protected by their reputation of 35 years of fair dealing. Our laboratory is our safeguard. Very few seed houses are equipped to test seed in the same efficient manner as the Berry Seed Company and our tests are very accurate, giving our customers the utmost protection.

World's Greatest Seed Bargains Now Available to One and All

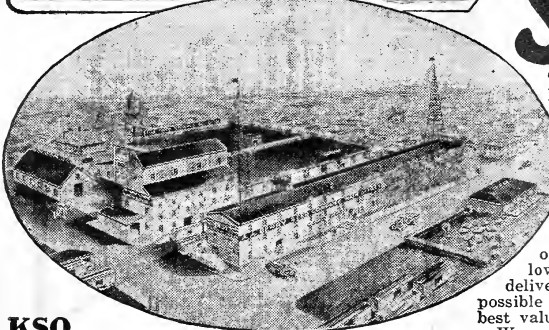

SERVICE

The two chief essentials of a successful Mail Order Seed House are high quality and quick service. No one in the seed business appreciates these facts more than the Berry Seed Company.

Our business has increased with leaps and bounds and our Eastern customers demanded Berry's Seeds be supplied from a closer point than Clarinda. We now carry a complete stock of all Farm and Grass Seeds in Chicago in the above warehouse. This gives our Eastern customers the advantage of our low prices, a lower freight rate, and quicker delivery. Our customers are entitled to the best possible service in the way of quick shipment and the best values in seed money will buy.

We are offering a wonderful service in the way of supplying tested seed of known quality at prices far lower than the same quality can be obtained elsewhere. The large volume of our sales explains why we can sell seed of high quality at such attractive prices.

The magnitude of our business and our ability to serve you is well demonstrated by the facilities illustrated in the picture of the home plant and our warehouse and shipping facilities in Chicago. Address all mail to Clarinda. We have only a shipping branch and no office at Chicago.

KSO AND UNCLE JOE

Our Service Department is in charge of Uncle Joe Faassen, chief announcer and Secretary of the Berry Seed Company. He is an agricultural expert and an authority on farm crops. He has made a study of farm crops and has qualified as a writer of real ability and help to the farmers. If you have farm problems and planning of crops, call on Uncle Joe. He handles much of the correspondence and is in position to help you with your seed problems.

TUNE IN ON KSO

Thousands of listeners prefer KSO to all other stations. Morning program starts at 6:30, noon 11:45, afternoon 3:00, evening 6:30 to 8:00, and 9:00 to 10:00. Our wave is 217 meters or 1380 kilocycles. Try and tune in on KSO and hear some of the splendid talks made by Uncle Joe.

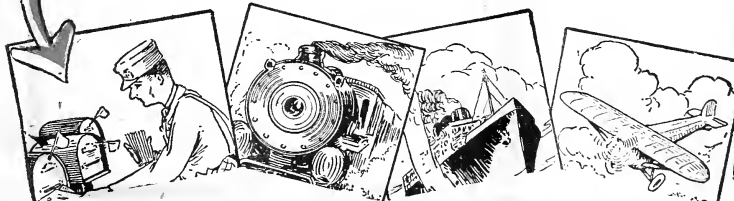

HISTORY

The history of the Berry Seed Company is a very interesting story. Mr. Berry established the business in 1893 on his farm near Clarinda and the business continued to grow necessitating the incorporating in 1905. At that time Mr. J. F. Sinn joined the Company, and has been instrumental in developing and building it up until today there is no seed house that sells as large a volume of seeds direct to the farmers. We have the distinction of serving the farmers for 35 continuous seasons and during all that time, we have never been sued by any of our customers or had any complaints filed but what we were able to settle satisfactory. During these years we have added thousands of new customers to our Seed Family. We are today serving more customers than ever before. We are well established and recognized as leaders in the direct selling and merchandising of seeds. Our seeds today are delivered to you by mail, train, ship and aeroplane. Nothing too good for Berry's customers. A gift for every order, see page 48.

35th Anniversary Money Saving Service

This year we are celebrating our 35th Anniversary in the selling of seeds direct to the farmer by offering in this Catalog the greatest collections of Seed Bargains ever placed before the seed buyer. Every lot is a genuine bargain Guaranteed to Save Money.

You are dealing with an old established reliable firm and one that guarantees every pound of seed sold. You have 60 days to test all lots. If not convinced you have saved money and have a big bargain in your purchase send the seed back. Your money is here waiting for you and your transportation charges.

**World's Largest
Seed House
Selling Direct
to Farmers
on the One Profit
PLAN**

Linkup With Berry Save Middlemen's Profits

You can do this as the Berry Seed Company buys most all of its seeds direct from the producer and we do our own reselecting and handle in such large quantities, that we buy at the lowest prices at which the crop moves. This fall we had our buyers in 14 states traveling from farm to farm, selecting and buying the finest lots of seed available at the very lowest possible prices. Our 35 years in the seed business gives us a tremendous leverage in buying as we know the producers in many cases personally and get the preference when buying their seed.

They know we pay cash and will treat them fairly and squarely when settling for the seed. It is our buying direct from the producer early in the season that permits us to offer such outstanding and unduplicated values. When you buy from us you are going directly to headquarters and not paying two or three middlemen's profits. Linking up with the Berry Seed Company cannot help but save you many dollars on every bushel of seed you require.

\$1,500,000

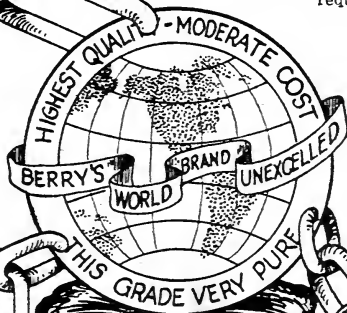

It would surprise you to see the tremendous quantities of seed we carry. As this catalog goes to press we have over \$1,500,000 worth of seed on hand in our warehouses, all reselected, scarified and prepared ready for shipment on a moment's notice. Buying as we do our seed as it moves from the producing sections, enables us to buy at much lower prices. We do not need to depend upon the carlot seedman for our supply. In fact we have our stocks bought so that we can sell the carlot buyers, and do sell some of the largest seed houses a part of their supplies. When we can serve the largest dealers to advantage, we are sure we can sell the farmer who needs seeds and at a price that will save money. The largest users of farm seeds in many cases depend entirely on the Berry Seed Company for their supply.

WHY THE LARGEST DEALERS

You may wonder why the Berry Seed Company located at Clarinda, Iowa, are the largest dealers in the world when it comes to selling farm seeds direct to the farmer. This is due to the policy of selling a very large volume of seed on a very close margin. We pride ourselves on the efficiency of our organization and our ability to undersell any other concern when quality and service are considered. We have spent over a third of a century in the seed business, specializing in farm and grass seeds until we have no equals. This business has been secured on the basis of fair play, biggest values for your dollars. This year we are celebrating our 35th anniversary and are making this catalog an outstanding beacon light to show the way to new seed buyers who are not already acquainted with our wonderful values in seeds. We have cut our prices and in many cases are selling seed for less than the wholesale price, due to the fact we want to add thousands of new customers to our list of seed buyers. We are giving the seed buyers an opportunity of getting acquainted and we feel sure a trial order will lead to more business. Our old customers are our greatest assets. They are always willing to vouch for our reliability and the fact they have saved many dollars by buying from us. (See letters.)

THESE WONDERFUL BARGAINS WILL NOT LAST

In sending out the large number of catalogs we are mailing, and pricing our seed so much lower than others are asking, can only bring one result, and that is a deluge of orders. We have anticipated these results and have fortified ourselves with tremendous supplies, but we cannot guarantee to fill orders of the late comer. Those of you who need seeds should use the catalog immediately, making up your order at the earliest possible opportunity. We will do our utmost to take care of it promptly and satisfactorily. You understand many of the lots offered in this catalog are special bargains bought especially for this Anniversary sale and when they are exhausted they cannot be replaced. This means that the early buyer is going to stand the best chance of having the order filled without question.

WORLD BRAND (Extra Fancy).—Our very best grade of tested, reselected seed, representing the cream of the crop. We stake our reputation on our World Brand quality. It will please and satisfy the most critical buyers and those who wish the best.

DEALER'S FANCY.—This is a very Fancy Grade of seed which has been carefully reselected and graded and meets the requirements of a large number of buyers of grass seed. It is superior to much of the seed offered in a retail way and a grade of seed that universally satisfies.

PLANET BRAND.—This pleases the average farmer and gives satisfaction and we do not hesitate to recommend it as good serviceable seed. While it has been carefully reselected, it is not the best quality or the grade we recommend to critical trade. We consider it extra good value and is generally demanded by a large number of customers.

STAR BRAND.—This is our cheapest grade and the one frequently demanded for overflow land or when buying seed for fertilizing.

RED CLOVER

the GREATEST BARGAIN

LOT LEADER
\$ **11.70**
Pr. Bu.

A Beautiful Lot of Hardy Home Grown Seed
New crop—Triple cleaned—Analyzed—Tested—Guaranteed to satisfy in every way. High purity including a trace of crop seed. Strong germination. High color, plump berries. Free from noxious or dangerous weed seed. Suitable for sowing in any part of the United States. Lot "Leader" stands out as the greatest of all seed values. We do not believe anyone can come within \$2.50 to \$3.50 of our great bargain price.

Bought Early—Saved for This Sale

Last fall we worked hard in getting together a large lot of this seed in preparation for this great sale event. We were determined that this would be the most "talked about" sale ever undertaken by offering seed bargains of astonishing value.

This seed today is worth as much in carload lots as our bushel prices to you. You will never get more Red Clover value than is offered you in Lot Leader.

We have saved this lot for this sale because the purpose of this sale is to get new customers and we are offering irresistible values to accomplish this result. When you learn by use the high and satisfactory quality of our seed you will do all of your buying direct from farm seed specialists at money-saving prices.

Lot "Leader" Thoroughly Dependable Seed

This seed will please every farmer who wants clean, hardy seed that will grow. That is what you will get. There is no guess-work about this statement. The seed is analyzed and tested. We know what it is and what it can do. It is sold subject to your approval. See money-back guarantee below.

We Challenge the World With Lot Leader

We ask you to be the judge in this matter. Our claim is not merely that others do not beat this bargain but that they do not even duplicate it. Our proposition to you is this: Buy Lot Leader now, while we have it. When it comes, take

out some of the seed and compare it with samples others offer. When you find a sample of equally high value, then compare prices. If anyone can do as well, give you as good a value for the same money, you may then return our seed and we will refund you all the money you paid, plus transportation charges. What could be fairer!

Sold Subject to U. S. Government Test

While our seed has been analyzed and tested for your protection, we offer you every other protection you desire. After you receive the seed and look at the test tag, which is put on every bag, you can, if you wish, send a sample of Lot Leader to the U. S. Govt. Agricultural Department at Washington, D. C., for test, or you can send it to your State College. We give you 60 days in which to do this. If you are not satisfied then you can still return the seed and get your money, plus freight, refunded.

We positively know Lot Leader is high grade, dependable and satisfactory. You take no chance when you buy it. The wise thing is to buy it now, while we have it.

MAMMOTH RED CLOVER

The SENSATION of 1930

GENUINE NORTHERN GROWN MAMMOTH CLOVER

Lot Matchless is just what its name implies. A value that for equal quality cannot be duplicated elsewhere. Sold on the same basis as Lot "Leader" Medium Red Clover, as described above. This is fine colored seed, plenty of purple in it. Nice large berries full of strength and vitality. Free from dangerous weeds. High in purity, quick in germination. Hardy northern grown seed.

LOT MATCHLESS WILL SATISFY ALL

In this history-making Anniversary sale, Lot Matchless writes a big chapter. A beacon light of value that lights the path of more intelligent seed buying. It dispels the fog of doubt as to whether high quality can be bought at lower prices. It proves the money-saving truths that direct buying and selling saves the consumer money.

When crop is wanted mainly for soil building Mammoth Clover is generally used. Also is known as Sapling Clover and Bull Clover. Growth larger and coarser than Medium Red. Grown extensively in north where seasons are too short for two crops. This wonderful Lot Matchless was secured direct in the great northern producing section. We can't get such seed today at anywhere near the price we paid for it. It is a rare opportunity to save \$2.50 to \$4.00 per bushel and be assured of getting this genuine Mammoth.

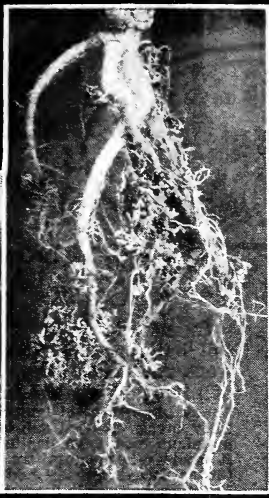

LOT MATCHLESS
\$ **12.50**
PER BU.

THIS GIANT 35TH ANNIVERSARY SALE WILL SAVE MANY DOLLARS

INOCULATION *in* ADVANCE

The Berry Seed Company takes a big stride forward this year in offering to supply all legume seeds inoculated in advance for less money than you can buy the material for. The charge is only 50c per bushel and the new McQueen's Dust-Cote Dry Inoculator is used in treating this seed. This inoculation is guaranteed to make nodules on the roots. The cost of inoculation is refunded if it fails to do this. Seed comes to you already inoculated ready to sow.
(Inoculated)

This new Dry Inoculation is simply dusted on the seed in the dry form. Seed is not moistened in any way. Does not injure seed in any manner. We secure this inoculation in the bulk saving the cost of many small containers and much labor cost. Our special mixing machinery permits us to put on the inoculation at small cost and we can give you the inoculating material and labor both for less than what the material alone would cost you.
(Not Inoculated)

NOW YOU CAN GET YOUR CLOVERS, ALFALFAS, PEAS, BEANS, AND VETCHES ALREADY INOCULATED

This is the kind of service you have been wanting for a long time. We are glad not only that we can give you such service this year but that we can render it at so low a cost. You should now inoculate all your legume seeds.

How to Order Inoculated Seed

If you want your seed inoculated simply say so in your order and add 50c per bushel for every bushel you want inoculated. It is not necessary to do this for Dalea Clover or Soy Beans as our prices on these seeds include inoculation. If you want the Grimm Alfalfa inoculated we will have to break the seals on the bags. You may therefore prefer to inoculate that yourself by using either Berry's Nodule Germ or Nitragin described and priced below.

All Legumes Should Be Inoculated

All Clovers, Alfalfa, Peas, Beans and Vetches need the proper bacteria in the soil in order to make their best growth and production. There is no sure way of knowing that those bacteria are in the soil excepting by sowing inoculated seed. Some soils are partly inoculated, and will grow some legume crops without inoculation but they would grow those crops to better advantage if the seed were inoculated. Even on crops that ordinarily grow quite well a better yield and higher feeding value is generally secured by inoculating the seed. The cost is small. With Red Clover for example which is often sown at the rate of a bushel to eight acres the cost of our advance inoculation is only 6c per acre. With Alfalfa it is only 12c and that small expenditure often means the difference between success and failure. You can't afford to gamble the value of a crop against so low a cost. It is worth many times its price to get proper and thorough inoculation.

What This Service Means to You

You don't have to bother with a thing. No muss or fuss. No seed to moisten. No inoculation to stir into the seed. No seed to dry. No mixing machinery of any kind required. You don't have to be so particular in keeping this inoculated seed out of the sun for it is prepared from hardy outdoor developed bacteria. Early covering of the seed after sowing is best but you don't have to be so extremely careful. In other words you are getting a high grade inoculant already put on the seed for less money than ever before.

A Service That Has Long Been Desired

For many years we have been receiving requests from our customers for advance inoculation. We have previously been compelled to advise that we could not do it as no manufacturer had a suitable product. Now, however, the McQueen Bacteria Company have developed this Dust-Cote inoculant that could be applied dry and in advance. It is upon the work and statements of this well known concern that we base this service to you which marks an epoch in inoculation history. It is this spirit of service to customers that makes for mutual progress.

COSTS ONLY 50¢ PER BU.

NITRAGIN

The original soil inoculator. Guaranteed to make nodules. This leading brand of inoculation has been the reliable standby of farmers for years. A true and tried inoculator that comes to you always fresh and teeming with millions of bacteria. Full directions for use on every package.

SWEET CLOVER

**The GREATEST
PASTURE and SOIL
BUILDER**

A representative of one of Chicago's Largest Banks writes as follows:

Nov. 18, 1929.

Dear Mr. Sinn:

I was very much pleased to find upon receipt of your shipment of sweet clover, that it was much cleaner, of a better average grade, and this fall we found that it had a higher percentage of germination than any other seed we have been able to purchase.

We find the outstanding results from the use of sweet clover are: increased productivity, elimination of weeds, and makes good hay or pasture. Through the use of sweet clover we have built up our land to such a state of productivity that this year we were able to dispose of a majority of our farms in my district.

Very sincerely yours,
W. M. Knutson,
Council Bluffs, Iowa.

You can make your land produce more grain per acre

The more bushels per acre the lower the cost per bushel to you

Sweet Clover is the most effective, quickest working soil building force that nature has given you. Put it to work for you. Sweet Clover gathers enormous quantities of nitrogen from the air. Its root development is rapid. Those big, powerful roots go down deep and they go down quick. They break up hard sub-soils permitting good drainage. They bring up plant food from depths that other crops do not reach and leave it where other plants can get at it. When plowed under the Sweet Clover decays quickly adding humus as well as fertility to the soil. It makes light soils heavier, and heavier soils lighter. In short, it is a miracle worker as a soil renewer.

year it makes two hay crops, or a hay and a seed crop. Or one crop for hay, and one to plow under. Many plow under the first crop the second year just before corn planting time and get double quick results in that way.

As a pasture it ranks second to none. Takes care of more stock per acre than any other crop. Feeding value extra high. Less danger of bloat than other clovers. Keeps stock sleek and fat. Reduces grain requirements.

We Are Sweet Clover Specialists

We sell more of it today than any other seed house selling direct to farmers. Our sales run between 3,000,000 and 4,000,000 pounds of Sweet Clover seed per year. We have the best machinery obtainable for handling the seed. Our scarifying method is the newest and most efficient to be had. Old methods used by most seed houses are obsolete. We are recognized all over the United States as Sweet Clover specialists.

Increases in Yields

Twenty-five bushels more corn per acre after Sweet Clover is a common occurrence. Yields are frequently doubled. Increases in small grain production are just as startling. Potato yields increased 60 bushels to the acre. The facts may sound like exaggerations but they are truthful facts just the same. You almost have to use it to know about it. Once you get Sweet Clover started and learn first hand of its wonderful power you will be an enthusiast of the highest order. Man, it's one of the greatest money making crops you can grow. It's been a life saver for thousands of farmers. It has turned aside the tide of discouragement and brought new life and satisfactory profits in its place.

Other Values of Sweet Clover

Sow 15 lbs. per acre with spring grain or on winter wheat. It generally makes a good crop of fine hay for the first year. It is fully equal to Alfalfa. Or if you don't need the hay it gives an abundance of pasture. Second

SPECIAL ANNIVERSARY BARGAIN

The unhulled seed is the stock just as it grows on the plant. The hull still is on the seed. It has, of course, not been scarified or the hull would not be there. Such seed is of slower germination than scarified stock. For a late spring seeding it is not advisable. It is better than scarified seed however for winter or early spring seeding. The freezing weather breaks up the hull and softens the enamel on the seed. Then when good growing weather comes it starts to grow quickly. It has become well imbedded in the soil and is off to a good start. It is not, however, started by the winter thaws that are followed by hard cold freezes. Many early seedings of hulled Sweet Clover are destroyed in that way.

**Our Unhulled Seed
Is a Fine Product**

Some dealers offering unhulled seed sell it just as it comes from the machine with perhaps a few sticks removed. Our unhulled is double cleaned with the same care that is used on the hulled seed. Therefore we offer you in our unhulled a high quality of seed. It will please any buyer no matter how particular. There is a money saving opportunity in this seed. Compare values. Check up on us. We challenge the world on Sweet Clover values. More unhulled seed is being used this spring than ever before.

Prices Good While Seed Lasts

Every lot is a bargain made specially with the view of making new friends and customers for the Berry Seed Company. We know the quality will please you and bring you back when you want more. That's why these values are bargains that you can't duplicate elsewhere. Quality for quality and price for price we challenge all competition.

YOU CAN MAKE YOUR LAND MORE PRODUCTIVE WITH SWEET CLOVER

OUR SWEET CLOVER GREATEST BARGAIN LOT

**A Bargain Among Bargains!
A Climax!! A Record Breaker!!!
See Sample Enclosed**

Lot Grow More is a value in Sweet Clover with which we challenge the world. Look the sample over. Compare. Check up. Consider its quality. It is triple cleaned. It is scarified by our modern method. The purity is good. So is the germination. We challenge anyone to give you as much value for so little money.

There is Thrift and Economy in Lot Grow More

This is the seed for the practical thrifty farmer who wants satisfactory results at the lowest possible seeding cost. This is the big white sweet clover containing less than 5% of the leafy yellow Biennial which is not objectionable as this yellow is a very popular variety. Color not as high as our Extra Fancy and seeds not quite so large which means more seeds per pound. Pound per pound it sows as far as the best. This is analyzed and tested seed, sold subject to the strict Iowa seed law, and fully guaranteed.

GROW-MORE Only \$3⁹⁰

We Guarantee a Saving

Buy this seed. Order plenty at this extremely low price. When it comes you must be satisfied. If you are not, if you do not consider that you have saved money, let us know. We'll give you shipping instructions and refund your money plus freight. We know what Sweet Clover seed values are. We are pioneers in establishing Sweet Clover as a farm crop. Our position of leadership is recognized. We know what we are talking about when we tell you that this Lot Grow More is a Real Bargain. It is our greatest leader in this great 35th Anniversary Sale. The saving will generally run from \$1.50 to \$2.00 per bushel.

Send Your Orders in Now

There isn't a finer or better friend and customer-making value in this Anniversary Sale book than Lot Grow More. You will make an extra saving when you buy this lot. We know from past experience that a value such as this sells fast. Order it now while we have plenty of it.

Add 15c per bu. if Chicago shipment is desired.

Shenandoah, Iowa.

Dear Sirs: I can gladly recommend your Grow More Sweet Clover, the best I ever used at any price. I got Sweet Clover at other seed companies costing twice the price with not half the results. What I bought this spring I sowed with Oats and it is all up fine. There is nothing wrong with Grow More. Germination is perfect.

Geo. Chambers.

Gentlemen: I always buy my Fairfax, Mo. Fairfax, Mo. Berry Seed Co. as I can save about \$2.00 a bushel. I have found that the cheaper seed gives fully as good results as the best. I have used Lot Grow More, saving \$2.00 a bushel and getting a bumper stand. I can recommend this grade of seed as it sure grows and produces wonderfully.

Flood L. Fellows.

LOT BEAT-EM-ALL \$4²⁰ PER BU.

**\$4.35 if Shipped from Chicago
Another Super Bargain**

Our leadership in the Sweet Clover industry brings us the opportunity to secure many lots of seed at bargain prices. Lot Beat-Em-All is one of these lots that we are passing on in this 35th Anniversary Sale at an extremely low figure. It is a higher colored lot of seed than Lot Grow More of which we enclose a sample. Anyone ordering this Lot Beat-Em-All will get a value that we guarantee will beat any other seed you can buy anywhere for the same price. If in your opinion this seed is not worth about a dollar a bushel more money, send it back, and get your money plus freight refunded.

Big White Variety

Lot Beat-Em-All is hulled and scarified and recleaned Big White Sweet Clover. This is the kind most farmers sow. It has been prepared with great care and is a seedling that will satisfy. It is good seed very free of weeds, good sized berries, and good color. If you want something a little better looking than Lot Grow More and still hold your seeding costs down to an extremely low figure you should order this seed.

It is much cheaper to sow than Red Clover. It is vastly superior to it as a pasture crop. There is nothing that will equal it as a soil builder. Profitable farming requires more fertile acres and this crop will produce that fertility more quickly and in greater abundance than any other crop.

You get more than your money's worth in this great Anniversary bargain. Get started in getting better seed for less money by placing your order for it now.

LOT VIRGIN \$4⁵⁰ PER BU.

**\$4.65 per bu. f. o. b. Chicago
Equal to the Average Best Seed**

There are many seedsmen who sell for what they call their best Sweet Clover seed a quality that is not as good as Lot Virgin. If you wish we'll be glad to send you a sample so you can make your own comparison. Their higher prices might lead you to think the seed was better. We ask you to find out for yourself. In this Lot Virgin you find the clear indisputable and convincing evidence that you can buy quality stocks for less money than you have been accustomed to paying.

This seed is one of the big reasons why you should begin buying your seeds direct from the Berry Seed Company who are the largest dealers in the world selling farm seeds direct to farmers.

Fine Quality—Big White

Lot Virgin like all lots on this page is the Big White Sweet Clover. It is hulled, scarified, and triple cleaned seed. The color is good, the berries are plump, the germination is strong, and the purity high. You will find it fully equal to what is generally sold as the best. It is not quite equal to our Extra Fancy grade but unless you had the two side by side you would probably fail to notice the difference.

We recommend this Lot Virgin to the farmer who wants a very fancy quality at the lowest possible price. We have reduced our price materially on this lot for 35th Anniversary Sale. We are making it doubly to your interest to send us your order for we know that the satisfaction you will get from this seed will bring you back as a steady customer.

HIGHEST QUALITY AT BARGAIN PRICES SWEET CLOVER

Lot BEAUTY \$4.90
PER BU.

Add 15c per Bushel for Chicago Shipment

Pure Biennial Big White Sweet Clover

A rare bargain in very fine quality. A value that is "topnotch." Seed that will satisfy critical buyers. Stock that will give the very best possible assurance of success. Nice big plump seed. Extra good color. Double cleaned. Thoroughly scarified by our modern method. The germination and purity excellent. It is a target in value-giving that is beyond the range of the average dealer.

We guarantee you can't duplicate it. If you can match this quality for the same price anywhere we will not ask you to keep our seed. We will have it returned, and refund your money.

Extra Value in This Lot

You'll never fully realize how much seed value can be packed in a dollar's worth until you get some of this Lot Beauty. It is sold subject to any test you wish to put it to and guaranteed to satisfy in every way. This lot of seed is most deserving of its name, "Beauty." You'll be proud to sow such seed. You will know when you see it that you have practiced true economy in securing such fine quality and at such a low price. If you paid \$1.50 to \$2.00 per bushel more you would still be satisfied, for it has the quality that produces the best possible results. See page 5 for information on inoculation.

LOT PREMIUM \$4.80
PER BU.

\$4.95 per Bu. Shipped from Chicago
Contains a Small Percentage of Alfalfa

Here is another matchless value that makes your seed dollar about 25% bigger. This is a very nice lot of Big White Sweet Clover. Good color and purity. We secured this lot for considerable less than its practical value because it had a small percentage of Alfalfa in it. That doesn't hurt the seed. In fact, the majority of farmers like a little Alfalfa in their Sweet Clover. However, technically speaking, the Alfalfa cuts down on the purity test. Sweet Clover, for example, that was 99 percent pure would only test 94 percent pure if there was 5 percent Alfalfa in it.

Very Free of Weed Seed

It is free of dangerous weed seed. Any farmer who does not object to a small percentage of Alfalfa will surely be completely satisfied with this Lot Premium. It enables you to get a fine quality at a lower price than would otherwise be possible. Sowing such seed is an excellent way of starting Alfalfa. Lot Premium is also high and strong in germination. All of these are Sweet Clover are thoroughly scarified by our modern method. It is much easier to get a stand by using seed than by improperly or carelessly prepared seed. You can't go wrong by selecting seed such as this Lot Premium and you will save money by doing so.

GRUNDY COUNTY Lot EXCEL \$5.00
PER BU.

An Earlier Variety of White Sweet Clover 99 1/2% Pure

The very finest grade of this particular variety of Sweet Clover. This extra fine lot is priced for this sale down to the last penny. It is a lot that cannot be excelled for quality at the price. We'll take back our seed and refund your money if you can.

Cheaper to Sow Grundy County

This is a smaller seeded variety. There are more seeds per pound. When the common is sown at 15 lbs. per acre, this is sown 10 to 12 lbs. A bushel of Grundy County covers 5 to 6 acres, as compared to 4 acres per bushel of the common. It is easy to see the seed is cheaper to sow.

It does not grow tall and coarse. Average height is 3 1/2 feet. Seldom grows taller. That really is tall enough. This variety is exceptionally valuable where the common white grows real tall and coarse and rank. Many farmers who have grown both kinds are discarding the common in favor of the Grundy. It is about three weeks earlier than the Big White.

Sale of Grundy Increasing Rapidly
This year is going to see the largest seeding of this variety ever made. The letters and orders that we have already come in show that. We are prepared to take care of your orders, unless you delay too long. Add 15c per bushel if Chicago shipment is desired. 50c if wanted inoculated.

LOT GOLD \$5.30
PER BU.

The Very Finest Quality of the Yellow Biennial Sweet Clover 99 3/4% Pure

In this lot you find quality supreme. The largest berries, the highest color, the strongest germination and excellent purity. It is simply A No. 1—the pure you may be, this seed will please you. We can't get it any finer. You might pay \$1.50 to \$2.00 per bushel more for your seed, but you wouldn't get it any better. It is double cleaned, scarified and put into first-class condition from every standpoint.

Extra Value of Yellow Biennial.

This variety is preferred by many to the white. It is finer stemmed and more leafy. Therefore, it makes better hay. It does not grow as tall and coarse as the white. It is about 10 to 14 days earlier than the common white. It is unquestionably a superior kind for hay and pasture. Probably just a shade close second. This Lot Gold is priced to save you \$1.50 to \$2.00 per bushel, quality considered. Very few dealers handle so fine and carefully prepared lot of seed as the strictly extra fancy Lot Gold. We guarantee satisfaction. If Chicago shipment is desired add 15c a bushel to above price. There is no better value in Yellow Biennial Sweet Clover than Lot Gold.

**A Striking Bargain
That Makes a Highly
Satisfactory Seeding**

This is the clover that some have so aptly called "The clover that never fails." Grows on wet land, sour land, and high land. A little goes a long way as the seed is very small, only half the size of red clover.

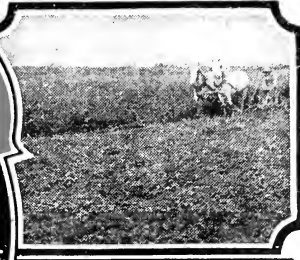

Lot Economy is a remarkable value that we secured especially for this great sale event. Most of our regular customers sow Alsike mixed with Timothy because a mixture of the two yields more than either one alone. Most of them use a mixture containing 10% to 30% Alsike. A 20% mixture makes a rich mixture.

We were able to secure in this lot "Economy" several cars of Alsike Clover that contained some Timothy at a price that makes it possible to make this astonishing offer. It is composed of over half Alsike clover and will make an exceedingly rich seeding; one that will give you wonderful results.

It is all double cleaned seed, extra choice quality. Very economical to sow. A seeding of only 10 lbs. per acre would give you over 80 Alsike seeds on every square foot of ground. Sow 8 lbs. per acre and you have 65 Alsike seeds per square foot.

Such a seeding makes highly gratifying yields of finest quality hay. Can be used for pasture or meadow. This bargain stands out as an unparalleled value under 1930 market conditions. You can cut your clover seed bill 30% to 40% by using this famous Lot Economy. Guaranteed to satisfy you. Your money back if you can duplicate it anywhere.

**LOT
ECONOMY**
\$ **7.80**
BU. 60 lbs.
**35th Anniversary
SPECIAL**

**A Remarkable
Bargain Offer**

This lot of Alsike we bought early so we could make a bargain that would be second to none in the line of good, clean Alsike testing very free of weed seed. Several advances have taken place in the Alsike market since we secured this lot. It contains a small per cent of White Dutch Clover and a still smaller per cent of Timothy. Nothing harmful, just a little crop seed that permitted us to buy it at a low price. We wanted to give you a safe, dependable lot of Alsike of good germination and have certainly attained that in this lot "Merit." It is a value most deserving of the name "Merit" for it has fine quality at a low price.

This seed is very economical to sow. Six pounds per acre makes a good seeding. See price list for quotations on purest Alsike without any crop seed, but if you want to save \$3.00 to \$5.00 per bushel order this seed. It will give excellent satisfaction.

**LOT
SURE-GROW** \$ **11.40**
BU. 60 lbs.

Alsike and White Dutch Clover.—The two Clovers easiest of all to start and makes the finest pasture. Hence the name Sure-Grow. You can buy high priced White Clover at a price lower than the cost of Alsike in this bargain lot. We bought lot Sure-Grow at about 65% of its real worth owing to the fact the two clovers cannot be separated. You will find Lot Sure-Grow about half White Clover and one of the biggest bargains offered in this catalog. Lot Sure-Grow is high purity, free of weeds, guaranteed, and cheapest to sow. Don't wait, buy now. Can't duplicate later.

The Annual White Sweet Clover

Lowest Price in History

This remarkable seed value is possible only because we contracted our seed early before the general shortage of seed of all kinds was realized. This same quality of seed last year sold generally at \$15.00 to \$16.00 per bushel. It may therefore be considered a masterful accomplishment to be able to sell it for less money this year when other sweet clover prices show no decline. Supply of seed still very limited. Higher prices might be realized but we are out to break all records in this sale.

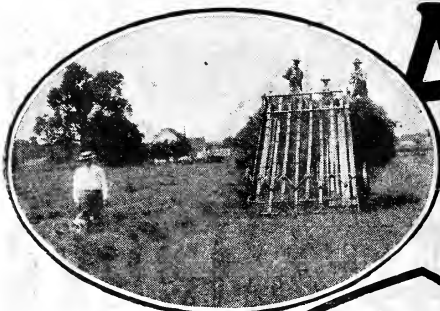

**The Phenomenal One-Year
Sweet Clover**

Nearly every farmer knows about Sweet Clover and its many money-making features. Hubam is a Sweet Clover, too, only it does in one year practically everything that the common Sweet Clover does in two. Sow Hubam in the spring like the common. It begins to grow rapidly after grain is removed. It makes full crop of hay same year. If not cut for hay it blooms and bears seed. Full benefits secured in four to five months after seeding. Hubam is an annual. Does not live over winter.

The seed of Hubam Clover has not been obtainable from all seedsmen. High prices have prevailed. In this "Third of a Century Sale" we are selling the highest grade of Hubam obtainable at the lowest prices this seed has ever been sold for since the crop was first discovered. The quality of Lot Marvel is strictly extra fancy. Double cleaned seed, scarified by the new process and fully guaranteed. There is a challenge in value giving in this lot that no seedsmen will meet with seed of equal quality. In this sale we are piling one Climax Bargain on another and saving the American farmer thousands of dollars.

WE GUARANTEE TO SAVE YOU MONEY ON EVERYTHING OFFERED

ALFALFA

The BIGGEST MONEY MAKING CROP

The Value of Alfalfa

There is no general farm crop that will bring you as large a net profit per acre as Alfalfa. It produces an average of three and sometimes four cuttings a year averaging a ton or better per acre. The value of the hay is seldom less than \$20.00 per acre. It sells readily for cash. The labor cost is low, and the profits large. Builds larger animals in shorter time. Reduces cost of growing pork. Produces more beef animals. Increases milk flow, and saves on the farm. We can only touch on its great value. There is no crop that will equal it. Now Our prices on Alfalfa in this great sale event are astonishingly low. Take advantage of these special bargains and keep your seedling costs down to bed rock. There never was a more favorable time for starting Alfalfa than now.

U. S. Verified Alfalfa

All of our Alfalfa seed is U. S. Verified Origin. That means the seed comes from exactly the section the tags say it comes from. The U. S. Government examines our record which show where every pound of our Alfalfa seed comes from, and who it is sold to. These government specifications and have designated the Berry Seed Company as "authorized Dealers." and blue tag on the bags showing service to protect you against any coming from one section that where else. When you buy direct from authorized dealers and profits that are necessary when the seed moves through several different dealers before being sold to you.

SUPER HARDY ½ GRIMM
LOT MORE HARDY

\$10.50
PER BU.

25c Per Bu.
Higher for Chicago Shipment

Character of Seed

This is sometimes called No. 2 or No. 3 of Grimm. It is obtained when grading up the best grades of Grimm. While it is a little off colored and berries are a little smaller it is of good purity and germination. Often farmers report better results from this seed than from the best. There are more seeds per pound on account of smaller seeds which therefore really makes a heavier seeding when sown at the same number of pounds per acre. There is real economy in this lot for it is super hardy and grows well. It is carefully cleaned, and graded. It is an outstanding bargain at this low price. Buy it now for it is a bargain that will sell fast.

We have already received many letters from old customers asking if we would have such a lot of seed again this year. It is a winner at this price.

A Most Un-usual Bargain

We doubt if any other seedman has ever offered anything like it. We had a small lot similar to it last year and our customers snapped it up quick. It is one half genuine Grimm Alfalfa which comes mostly from Montana and some from Dakota and a little Idaho and the true Grimm Seed. The balance is a goodly percent of the super hardy Montana common blended with our hardest Northwestern Mountain Grown.

THE BIG KROP

THE HONEST JOHN

\$11.70

A Bargain That Makes Your Seed Dollar About 20 Per Cent Bigger

This lot Big Krop is double cleaned and a very choice lot of seed. Good purity and

germination. Hardy northern grown seed. Many dealers sell a quality like this as their best seed. It will not grade as our best. Tests better than our choice grade, and not quite up to Dealer's Fancy. When it comes to results lot Big Krop will deliver the goods in a highly satisfactory manner. Grows quick and strong. Comes up clean. Withstands severe winters. Gives you everything you want excepting that extra fancy appearance in the seed. There is a little difference in the looks of the seed but no noticeable difference in results.

We guarantee to save you 20% on this lot. Send it back and get your money if you do not see such a saving when you get the seed.

Honest John a Most Sensational Offer

\$9.50

Think of it. Good, clean, mountain grown Alfalfa seed for less than 16c per pound. Buy it at low cost.

Honest John is a rugged, dependable value. Triple cleaned, heavy producing type. Good test in purity and germination. Contains some brownish seed, practically all of which will grow. Berries a little smaller. Not quite uniform in looks but it goes over the top in producing a stand. We have sold a similar type of seed for several years and have most enthusiastic reports on it. This lot at \$1.00 per bushel more money would make a bargain you couldn't touch elsewhere. We guarantee you a positive saving of \$2.00 per bushel. Return it and get your money if you can get that near it.

It is reliable seed. Thrifty and economical buyers will find this great anniversary bargain exactly to their liking. It starts you with a great money crop at a very small seeding cost.

history in this great price in Montana.
Lot Montana is a great seed in Montana.
epting. We consider it a great seed in Montana.

We are a great seed grower and have a large quantity of all the best seed in the world. We are now offering a premium in price for all seed sold in lots of 100 bushels or more. We are also offering a premium in price for all seed sold in lots of 100 bushels or more. We are also offering a premium in price for all seed sold in lots of 100 bushels or more.

Lot Montana
High Satisfactory Seed

This is a type and quality of seed that gives real satisfaction. It is hardy, clean and high testing at a rock bottom price that means a genuine saving to every buyer.

The purity and germination tests on this lot entitle it to rank as a first quality seed. It is a shade off in color, which keeps it from making our World Grand grade. It is not quite so uniform in appearance but from the standpoint of practical results and getting a good clean heavy stand we consider it equal to any. It is double cleaned seed and prepared with the same care as our highest priced Grimm.

Montana Alfalfa Wins Prize

The best alfalfa seed grown in the United States in 1929 was grown in Montana, receiving first prize at the International Live Stock show in Chicago. Our Lot Montana comes from this state, and near the same section where this prize winning seed was grown. This lot is free of noxious weeds.

It makes a safe and reliable seedling and will give you the best assurance of satisfactory results. Return it and get your money back if you do not believe you have saved at least \$2.00 per bu. We can't replace this lot after it's gone so play safe and order now.

The fame of Dakota Alfalfa is wide spread. Its resistance against winter killing is well known. It is the only kind some farmers will sow. There is usually a rush to pick up Dakota seed when it comes on the market. We had our buyer Jake in the Dakotas at harvest time this year. He is one of the most experienced buyers in the United States and secured this Lot Dakota at a very attractive figure. This type of seed often sells near the Grimm in price so you can readily appreciate what an exceptional opportunity this is.

Very Fancy Quality

This Lot Dakota makes a very desirable seedling. Good color, contains a few brownish seeds but on the whole good plump seed of high purity. Free of noxious weeds. Good germination. Entirely satisfactory. Guaranteed to please every farmer ordering it. Your money back, plus freight if for any reason whatsoever you are not fully pleased and satisfied that you have made a big saving.

We Urge Comparisons

We are anxious to have you fully appreciate the extent of the savings you can secure at the Berry Seed Company. Check up values by comparing. Get samples of any other U. S. Verified Origin Dakota grown Alfalfa seed. We'll be glad to send you our samples free. Note what others are asking for Dakota No. 12 seed. You'll realize more cearly than ever that we are giving the American farmers wonderful seed service. You will learn that it is to your interest to make us your seedsmen. Our direct selling methods mean dollars in your pocket. Our customers and friends number into the hundreds of thousands. It is these bargain offers such as Lot Dakota that make their number grow year by year. We invite you to join this host of satisfied seed buyers this year, and we are making it very much to your interest to do so with these money saving prices.

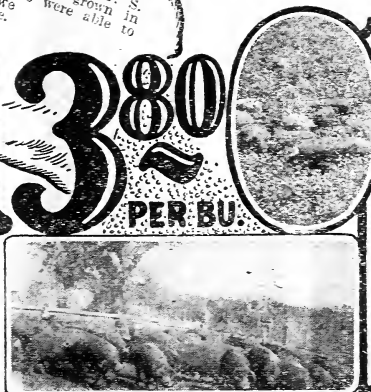

To do so with these money saving prices. This extra hardy dryland Dakota grown Alfalfa seed is one of the best types to sow. This clean pure high quality seed gives you the finest type of satisfaction. This lot will start you right with the greatest of all money making crops. This price is good as long as the seed holds out. It is bound to do fast at this very low sale price. So let us hear from you soon. Advanced inoculation 50c extra. See page 5.

PER B

LOT GOLD SEAL \$18

**Another Triumph in Value Giving
Genuine Idaho State Sealed Grimm—Dodder
Free 98½% Pure**

Nearly every farmer knows the high reputation of Idaho Grimm Alfalfa, and are glad to pay a good premium to get it. This year the Idaho Grimm is very short and state sealed stock has been hard to get. It was only by having several of our own buyers right in the state that we were able to secure this seed at prices that permit us to make such an astonishingly attractive price. You will find most dealers asking in the neighborhood of \$5.00 per bu. more for Genuine State Sealed Idaho Grimm Alfalfa seed.

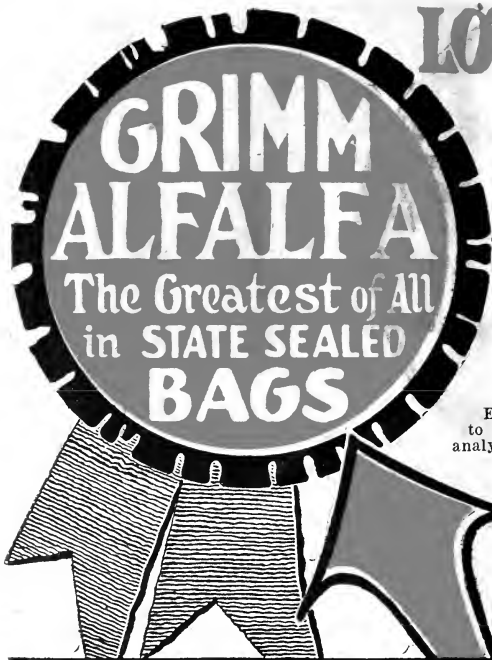

Lot "Gold Seal" Very Desirable

Every practical farmer who wants to sow Grimm will be delighted to get a chance at such a value. This is double cleaned stock that analyzes free from dodders and all other noxious weed seed. It tests 98½ per cent pure and strong germination. It would test 99½ if it were not for a very small trace of other crop seeds. It is especially free of weed seeds. It is just a shade under the extra fancy for color. This does not affect its practical value in any noticeable degree. Personally, we would certainly pick this lot when considering the great difference in price. This lot is quoted at a figure that will save you at least \$3.00 per bushel. It is selling at this low figure as we are out to break all records of value-giving in this unrivaled sale sensation.

You Save at Least 20 Per Cent on Lot "Gold Seal"

If you will take the trouble to compare values on Genuine Grimm Alfalfa you will soon discover the truth of this statement. Select any lot of state sealed stock, preferably Idaho Grown. Check quality for quality and price for price. In many cases the saving will run over 20 per cent. Remember this lot is analyzed, tested, labeled, and state sealed. Sold subject to U. S. Government Test, and under the provisions of our unparalleled guarantee. "Your money back if you can duplicate the value." Sow 12 pounds of this seed per acre.

Lot "Gold Seal" is one of our masterpieces in this sale. Be among the thousands to join the Berry Seed Family this year and share in these great savings.

Lot Certified Grimm Alfalfa

Good Color—Extra Fine Quality

**U. S. Verified Origin Alfalfa Seed Shipped in Sealed Bags—
Price Includes Inoculation in Advance**

This is another record-breaking bargain in this supreme seed-selling sale. It's a dandy lot of seed. Large berries, thoroughly cleaned, extra high purity, good germination. It leaves nothing to be desired in purity. And it's genuine Idaho and Montana grown Grimm. The origin of this seed or "place where grown" is certified to by the U. S. Department of Agriculture.

LOT CERTIFIED ALMOST A MIRACLE

This value may look like a miracle to some, but it's really due to careful buying direct in the producing section, a modern cleaning plant, and low operating cost. That, together with a small profit, because we are practically forgetting about profit in this Anniversary Friend-Making Sale. If we had not purchased this seed early we couldn't have made you such a price, for we couldn't duplicate it today.

SOW GRIMM THIS YEAR

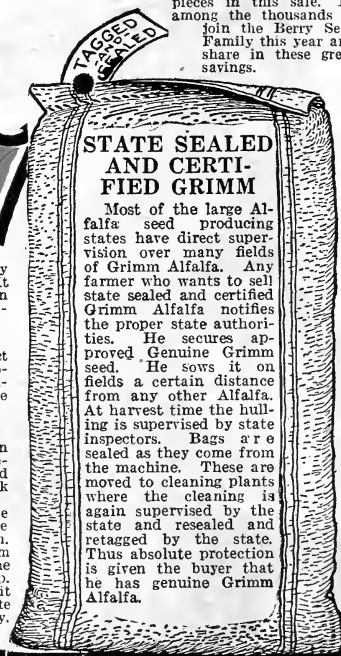

It is really economy wherever there is much winter-killing. After a bad winter, when ordinarily Alfalfa winter-kills badly, the yields of hay are greatly reduced. Often re-seeding is necessary. In such a year the Grimm withstands most any weather, will yield enough more hay per acre in one cutting to pay the total cost of sowing Grimm. Ask your county agent or your state college. They all endorse Grimm.

Ask them about U. S. Verified Origin Alfalfa and they will proclaim it as one of the finest features of service ever undertaken by the Government. We have no value more attractive than this special Lot Certified Genuine Grimm.

Our general 100-page catalog tells more about Grimm Alfalfa. You can have a copy of it free by mailing the enclosed postal card, which can be sent without a stamp. We will be glad to send you that book, but don't wait that long with your order. We cannot begin to duplicate this bargain after the seed is sold that we bought early.

Inoculated in Advance

**\$16.80
PER
BU.**

STATE SEALED AND CERTIFIED GRIMM

Most of the large Alfalfa seed producing states have direct supervision over many fields of Grimm Alfalfa. Any farmer who wants to sell state sealed and certified Grimm Alfalfa notifies the proper state authorities. He secures approved Genuine Grimm seed. He sows it on fields a certain distance from any other Alfalfa. At harvest time the hulling is supervised by state inspectors. Bags are sealed as they come from the machine. These are moved to cleaning plants where the cleaning is again supervised by the state and resealed and retagged by the state. Thus absolute protection is given the buyer that he has genuine Grimm Alfalfa.

INTRODUCING DALEA

The NEW MIRACLE CLOVER

Grows on Sour Soil

Our regular customers have known and used this clover for three years. There are many who get this book to whom this clover is new.

While new to many it has been grown in a limited way for a good many years. Like Sweet Clover its value was not known and appreciated until a few years ago. Its fame has now spread to many sections and the demand for the seed is phenomenal.

This clover is a one-year crop and accomplishes wonderful results in a very short season. Sown in small grain after grain is up. It grows fast after grain is removed, and makes excellent crop for plowing under. Its soil-building power is enormous. Gathers great quantities of nitrogen from the air. Crop is too bitter to eat. Cannot be used for pasture. Makes a good cash crop when used for seed as it produces 6 to 8 bushels of seed per acre.

Marvelous Soil Builder

The principal value however is as a soil builder. Thousands of farms need clovers. Some soils will not grow them without lime. Lime is sometimes not easily available and takes a lot of labor to apply it. Dalea is not sensitive to acid conditions like most clovers. It therefore solves the problem. It does its work quickly, needs just a few months. Can be sown as late as July and makes full growth to plow under. Grows on poor, sandy soil, clay and gumbo. Dalea should never be without inoculation. Our Dalea is inoculated in advance. See page 5.

PRICE REDUCED

1/4

6.00

CLARINDA
\$6¹⁵
CHICAGO

Wonderful Opportunity

We have slashed prices for this sale unmercifully. Recently seed of this quality sold for \$16.00 per bushel. This season we bought every pound of the seed of good quality that we could get and have practically a "corner" on it. Yet we are reducing our price to less than last year's prices. The supply of seed was somewhat more plentiful yet not enough to fill the demand. We have no doubt but what we could sell every pound we have for \$3.00 per bushel more money. Our policy however is to sell on a close margin.

Lot "Miracle"

It is rightly called lot Miracle, for it is a wonder worker as a soil builder.

This lot of seed is new crop and beautiful quality. Absolutely the best Dalea seed is a greyish green color but shaped about like Red Clover. This seed has a bright shiny lustre that proves its strong germination. Lot Miracle has been scarified by our modern patented process making it the finest that can be bought anywhere at any price. Scarifying is just as important as inoculation in growing Dalea. Everything that modern seed science can do for seed has been applied to lot Miracle. It is guaranteed to please the most critical and exacting buyer.

Start with this wonderful new crop this year. Figure 15 lbs. of seed per acre. In this sale you buy it at a lower price than it has ever been sold for before. Order now while we have it, as we cannot get additional supplies. A real anniversary bargain and a gift with every order.

NOW \$6.00 BUSHEL

\$8.40 PER BU. **CRIMSON CLOVER**

**60 Lbs. to Bu.
 Bags Free**

In the central and northern states this is an annual clover. In the southern states it may be sown in the fall and will live over winter. The seeds are much larger than those of Red Clover. It requires a seeding of about 15 lbs. per acre. Should not be sown too early. This variety is also known as Giant Incarnate Clover.

Good Producer

Crimson Clover makes quite a fast growth although does not grow nearly as large as other annuals such as Hubbard Clover. It is very much like the Medium Red Clover in appearance and manner of growth. Makes very fine clover pasture same year sown and a good hay crop if weather is not too extremely hot. Also used for plowing under for soil improvement. We have sown this seed very late in the spring in our section and secured satisfactory results.

Good Quality Seed

There is a great variation in the value of Crimson Clover seed. It requires more careful watching than Red Clover. Seed more apt to be of lower germination. We watch our seed quality carefully and have some dandy Crimson Clover seed for you. This is priced during our 35th Anniversary Sale at close prices. Seed supply is rather limited at this time and therefore advise all who wish our big value to order early. Seed must satisfy or can be returned and money refunded.

OTHER CLOVERS

**THAT YOU CAN'T
 MATCH FOR
 PRICE OR
 QUALITY**

White Dutch Clover

**\$20.75 per bushel; ½ bu.,
 \$10.50; ¼ bu., \$5.35;
 ⅓ bu., \$2.85**

This is a very low price for this clover. It is the small pasture or lawn clover you know so well. More expensive than other clovers, but the seed is so very small that three to four pounds sows an acre. It greatly increases production and feeding value of pastures and is a help to lawns.

Some farmers wait till this clover comes into their pastures, but that is a mistake. Modern farming operations demand that every acre do its utmost. It is cheaper to sow seed and get quick full growth than to wait.

This seed is a bargain. Often sells in a retail way around \$1.00 per pound. It is priced specially low for this anniversary sale event.

Inoculate Clovers

Even though your land may grow clovers fairly well you can generally increase production and feeding value by inoculating your seed. It is simple and inexpensive to inoculate. We can supply you with the material or inoculate your seed in advance of shipment.

Advance Inoculation

Only 50c per bu.

It is to your interest to read page 5 of this catalog. Learn about our new Dry Inoculation and how we can apply it in advance for less money than the material alone would cost you. With this new service available you should inoculate every bushel of your legume seed.

LESPEDeza \$5.00 PER BU. **or JAPAN CLOVER**

This is an annual clover. Will not live over winter. Not as sensitive to acid conditions as most clovers. Grows on most any soil very widely. Easy to grow. The central and northern states. The south and eastern states. The Leppedeza is, however, better for these sections as it is more productive there and earlier ripening. Leppedeza reseed themselves readily. Crop is good for hay pasture and soil building. Feeding value about equal to Alfalfa. Sow 20 lbs. per acre for full crop. Seed weighs 25 lbs. per bushel. We have secured a low sale price and have a low sale price in suite of shortage very

Korean Lespedeza Or Korean Clover

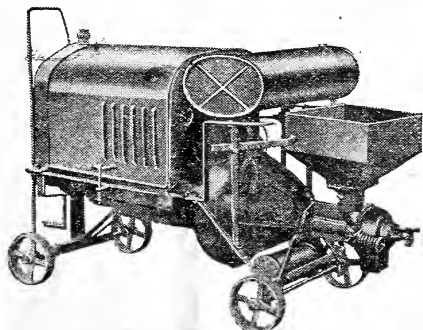

\$9.40 per bu.; ½ bu., \$4.90

Similar to Japan Clover but much more productive. Grows taller and more erect. It is two to four weeks earlier. By far the best variety for Central and Northern States. Sow like Red Clover but preferably a little later. OK to sow with small grain. 5 to 10 lbs. is sufficient seed per acre for a seed crop, 20 lbs. for hay crop.

Seed of this variety is still scarce and in heavy demand. Should prove profitable as a seed crop. Consider that it makes full crop in one year, grows on most any type of soil and is easy to get started. You are going to see this crop increase rapidly in popularity. Get in on it at the start. Same basis as Japan Clover. This seed is hard to get. Order it now if you wish some of it. Other dealers asking much higher prices.

Annual Yellow Sweet Clover

A small growing type of Sweet Clover. Most generally grown in south and far west and to a limited extent throughout corn belt. Not as profitable as other varieties. Our seed is well cleaned and scarified. See price list for wholesale quotations.

IDEAL GRAIN GRINDER

**Attaches to Any Model "T" Ford Motor
 DIRECT DRIVEN—8 INCH BURRS—GRINDS ANY KIND
 OF GRAIN—FINE OR COARSE—CAPACITY UP
 TO 90 BU. PER HR.**

The Ideal Grinder can be attached to any Ford motor in a few minutes' time. Can be used with Ideal motor truck as shown in cut or on Ford motor left in chassis. Costs less than one-half as much as other grinders having same capacity—low operating cost. Will pay for itself in a few weeks.

We also make a complete line of Ideal Motor Trucks, Governors, Power take-off Pulley Assemblies, Trailer Hitches, etc. Write today for free descriptive folders and prices.

Ideal Mfg. Co. Dept. 11 Des Moines, Iowa

MARVELOUS MIXTURE

A MARVEL FOR PRODUCTION

Sixteen years ago we first marketed this extraordinary combination. It satisfied our customers even beyond our fondest expectations. The use of Marvelous Mixture has spread like "wildfire."

No other combination has piled up such record-breaking yields or rich, nutritious hay as has this mixture. Our sales, which now amount to hundreds of thousands of pounds of this seeding, prove its growing popularity. Marvelous Mixture is almost invariably the choice of the farmer who wants plenty of clovers and yet hold his seeding costs down to bed rock. We can sell this seed at astonishingly low prices because we can buy a great many lots of seed that are grown mixed at liberal reductions.

THIS SPECIAL PRICE SENSATIONALLY LOW

The stock of Marvelous Mixture that we have assembled for this "35th Anniversary Sale" is the most remarkable evidence that seed specialization pays dividends to our customers. The large cash buying power of the Berry Seed Company is well known to large seed producers, and we thereby often get first chance to buy many lots. Samples from seed grovers pour into our office by the thousands in the fall. We have watched all these offers with discriminating care and as a result have these stocks that make these money-saving values possible. This bargain is an attractive oasis in a desert of high prices. To be able to offer such seed at the low price of \$5.90 per bushel is truly a marvelous accomplishment.

COMPOSITION

Marvelous Mixture is 50 per cent Clovers. Consider what this means to you. You must use plenty of clover if you want to farm profitably. You can't use the excuse of high prices with such a bargain before you. The clovers in this combination are Red Clover, Alsike Clover, Alfalfa and Sweet Clover. These are all the best clovers and the standard varieties for this country. The balance is Timothy. It is good, clean, vital seed, too. By purchasing some lots of Timothy mixed with Clover and some lots of Alfalfa mixed with Sweet Clover or vice versa we can buy high-grade seed considerably below its actual value. You get the full benefit of our service when you buy such seed.

SEEDING

You can handle this like any clover seeding. Sow on winter wheat or with spring grain. We believe that any seeding has a better chance for success if the seed has some covering when sown.

Sow Marvelous at the rate of 12 pounds per acre. A seeding cost of less than \$1.45 per acre. Think of it! A seeding so rich in clovers at such a low cost. And it's fine seed, too. Purity, germination, color, plumpness and hardness. All these points of quality rank high in Marvelous. Produces more hay, richer hay at a lower seeding cost than any other combination.

FOR PERMANENT SEEDING

A GOLD MINE FOR QUALITY

Lots of clovers in a mixture means a higher feeding value. Clovers are rich in protein. Protein is necessary and a high priced feed. Farmers spend millions of dollars for tankage and other protein concentrates. Much of this could be saved if more protein were grown on the farms in the form of clovers. Hang on to the cash. Let your acres produce this vital food element. In addition you are getting a more fertile soil, for these clovers are nature's forces for keeping a proper balance of soil fertility. It is this superior quality of our Marvelous Mixture together with its enormous yields that makes it such a great favorite in all parts of the nation.

GUARANTEE

It's guaranteed, of course, like all our seeds. Triple cleaned, analyzed and tested. Sold subject to U. S. Government or State Test. Buy it now. If at any time within the next 60 days you think you can equal this value you can send your seed back and get your money plus freight refunded.

Sweet Clover and Timothy A 50-50 Mixture \$4.00 Bu.

This combination fills the needs of those who know the great value of such a seeding. Makes very heavy hay production. Timothy and Sweet Clover together make a dense mass of vegetation. Feeding value extra high. Excellent for soil building. Reduces seeding costs to the minimum. Twelve lbs. sow an acre. Good quality re-cleaned seed. High purity and germination. Very popular with our trade. We sell enormous quantities of it. It is a big bargain at our special sale price.

If shipped from Chicago add 15 cent a bushel.

Alfalfa, Clover, Alsike and Timothy \$4.50 Bu.

This mixture specially prepared to meet a great popular demand. Excellent way to introduce Alfalfa to your farm. Big yielder. Makes excellent hay. Makes an economical seed. Use 12 lbs. per acre. Seed thoroughly re-cleaned. High quality.

We are selling this fine seeding at a real bargain price. It's another gem in our collection of super-values. A seeding that brings satisfaction. Demand for this combination growing fast. You get an extra measure of value in this seeding.

This four way mixture can be used for pasture or meadow. The feeding value is high and production heavy. You'll like it.

If shipped from Chicago add 15c per bushel.

ALSIKE AND TIMOTHY

Our No. 1
Mixture, a Rich Mix-
ture of Clean Seed

LOT "RICH"
\$4.40 CLARINDA
~
BU. CHICAGO \$4.55 BU.

Contains 20%
to 25% Alsike
Clover Seed

This is a bargain that is a super-value. A seeding that satisfies thrifty buyers and practical farmers. In it you realize the double economy of high quality at a low price. Even among the dazzling bargains that are packed in this catalog this Lot Rich stands out prominently like a diamond scintillating in the sun.

A Heavy Yielding Combination of High Value

Alsike, the richest of clovers, is a natural companion of Timothy for the two mature at about the same time. They grow on the same types of soil and make hay of very fine quality. These two grown together will produce a larger yield of hay than either one grown alone. The Timothy supports the Alsike, making it grow tall and erect. The Alsike stimulates the growth of the Timothy. It makes a combination that produces an amazingly heavy yield of hay that has a high feeding value. We sell many carloads of this mixture every year. It is our most popular one and it is certainly deserving of its favoritism.

Equal to 40 Per Cent Clover Mixtures—Costs But Little More Than Timothy

Alsike is a small seeded Clover. Twice as many seeds per pound as Red Clover. A 20 per cent Alsike mixture is practically equal to 40 per cent of Red Clover. This seed is re-cleaned and high in germination. We bought this seed already mixed and at almost a Timothy price. We added some Alsike to make it a very rich mixture and have in Lot Rich a value and a bargain second to none. It costs very little more per acre than the best Timothy. Not only does it produce more and better hay, but keeps the soil in better shape. Alsike is a soil-builder. Costs less than \$1.20 per acre to sow. Eleven to 12 pounds sows an acre.

You'll be pleased with this dollar-saving bargain. We guarantee that you'll be satisfied. It is one of our finest "friend-making" offers.

ALSIKE AND TIMOTHY NO. 2 MIXTURE \$3.80 Per Bushel Clarinda, \$3.95 Chicago

In this mixture you get the same high quality re-cleaned seed you do in Lot Rich. Equally desirable in every way except that it contains less Alsike, about 12 to 15 per cent. This mixture is plenty rich to please many farmers. Remember that a little Alsike goes a long way. Those who want clovers and yet want to make the most economical good seeding should select this combination. It is far superior to straight Timothy and costs but little more. Forty-five pounds to bushel.

RED CLOVER AND TIMOTHY

In this lot we give you the old standby of thousands of farmers at an astonishingly low price. With Red Clover prices imminent, this value is little short of amazing. Early purchases of seed grown mixed is the only reason we can make such prices. There is hardly an offer in this book that we could not sell today in a wholesale way for what we are selling it at direct to you.

Quality Very Desirable

This is good seed. It is live, clean seed. Both purity and germination are high. Contains a goodly percentage of Clover, around 15 per cent. You'll be surprised what a fine stand of clover can be secured from such a seeding. This has been the standard of this mixture of ours for many years. Farmers who have grown it, hail it as a famous value that makes each dollar spent for it an oversize dollar. It's guaranteed, of course, like every other item. The price at the side is good for this sale only. Forty-five pounds to bushel.

RED CLOVER Alsike and Timothy

A triple combination rapidly gaining in favor. Claimed by some of our customers to be the best of the four described on this page. Production seems to be heavier than just Red Clover with Timothy. Percentage of Clovers about the same. Seed is double cleaned, high germination and very pure. Sown at same rate as other mixtures, about 11 pounds per acre. Seed is laboratory tested and labelled to conform to Iowa seed law. Sold subject to your test and approval.

More for Your Money

By selecting these special lots of seed grown mixed we can bring to you these matchless bargains. We secure them below the value of the separated seed. You can't buy equal qualities separate and clean them at such a low cost. You profit from our careful buying and cleaning service. Then remember it goes direct to you instead of passing thru several hands first. Buy on the one small profit plan and save money on high quality. See page 48 for special premiums to new customers.

BROMUS INERMUS

'Also Known as Brome Grass'

\$18.80 per 100 Lbs., Clarinda
\$19.25 per 100 Lbs., Chicago

This great perennial grass selling at a price fully \$2.50 per 100 pounds below what the average seedman is asking for such a fine quality of seed. A bargain in grass seed that can't be duplicated elsewhere. This grass has a feeding value and a producing capacity superior to the average grass crops sown in this country. It is very palatable. Live stock is fond of it and do well on its nourishing elements.

Bromus is also one of the hardiest of our tame grasses. It resists both drought and extreme cold amazingly well. Thus for permanent purposes it is most desirable.

Bromus attains a good growth and makes very good hay. The leaves are a little broader than of the average grass and contains a lot of feed value. It stools out well and is therefore well adapted to pasturing. Stands lots of abuse, which is a prime requisite of a pasture crop.

OUR SEED QUALITY VERY FINE

Bromus is the largest seeded variety of any of the grasses commonly grown in this country. Seeds are long, fairly broad and very light in weight. It is one of the most difficult grasses to clean.

You should however insist on only the best re-cleaned seed. We spent a great deal of care and time in cleaning and grading our Bromus seed last fall, and have a fine, clean, high germinating product that we are justly proud of.

More and more Bromus is being demanded by our trade. The better the grass becomes known the more we sell of it. Not at all particular as to soil conditions. Grows most anywhere. Our stock is fair sized, but advise early ordering to avoid disappointment.

KENTUCKY BLUE GRASS

A grass that most every farmer knows and uses for pasture either alone or in combination with others. Your most important consideration in buying Blue Grass seed is to get it clean and live. You will find our extra fancy quality a grade of seed that is better than what is often sold as the best. This seed has gone through a double cleaning process making a very fine value. It is a bargain at our prices. See price list.

RED TOP OR HERD GRASS

Grows almost anywhere. Even the poorest land and the wettest land will grow Red Top.

Many farmers do not appreciate the full value of Red Top. It is very nutritious unless allowed to become too old. We recommend it for pasture mixtures. Begins growing early. Stay on the job throughout summer and autumn. Grows in all parts of the country. Contains more protein than Timothy. It will pay you to use more of it. During this sale we are making special wholesale prices that will save you money on quality seed. See price list.

CANADA BLUE GRASS

Sometimes called Virginia Blue Grass. Exceptionally good on stiff clay soils. Good for gravelly clay, but not for sandy soil. Grows on soil of poor fertility, excellent pasture grass. Makes good grazing.

WESTERN RYE GRASS

Grows 2 to 4 feet high. Grows on nearly all soils but does not stand much overflow. Excellent drought resister. Good producer 2 to 4 tons per acre. Matures a little later than Timothy. Sow 20 to 25 lbs. per acre. Usually makes hay first year.

ORCHARD GRASS

Another money-saving opportunity in this lot of re-cleaned Orchard grass. Very nice bright seed. High germination. This grass comes on very early in the spring. Good feeding value. Especially adapted to growing in shady places. An almost indispensable grass for pasture mixture. Has strong root system. Often sown on banks and levees. Not particular as to soil condition. Sow about 20 lbs. per acre. See wholesale price list page 24.

ENGLISH BLUE GRASS

Also known as Meadow Fescue. Next to the common Blue Grass is the most popular for a general, permanent pasture seeding. Grows two to three feet high. Very nutritious. Resists cold and drought. Makes good hay as well as pasture. Does well even on poor soil. It is a deep-rooted grass. Good on gumbo. Sow 20 to 25 lbs. per acre.

REED'S CANARY GRASS

Grows 4 to 7 ft. tall. Never lodges. Stand extremes of wet and drought. Enormous yielder. Begins growth early. Very palatable. Seed still scarce. Price, 1 lb., \$1.50; 5 lbs., \$7.00; 10 lbs., \$13.50, postpaid.

ENGLISH RYE GRASS

A rapid-growing grass. Very nutritious. Makes good quality. Its quick development of a rich, green sod makes it desirable for many purposes. Fine in mixtures to provide quick growth. Sow 20 to 30 pounds per acre when sown alone.

ITALIAN RYE GRASS

Similar to English but a larger and stronger grower and is an annual. Makes quick spring growth from an early seeding. Often used in pastures and lawns to give good growth while slower growing grasses are getting started.

BERRY'S BLENDED LAWN GRASSES

EXTRA CHOICE LAWN MIXTURE

Our most popular blend, containing, largely, Blue Grass, Red Top, White Clover, Rye Grass and other special grasses best suited for the corn belt soil conditions. We sell large quantities of this lawn mixture. It gives highly satisfactory results and is reasonably priced. Postpaid, 1 lb., 45c; 5 lbs., \$1.90; 10 lbs., \$3.50.

OTHER SPECIAL MIXTURES

Southland Lawn Mixture, containing Bermuda Grass and other varieties adapted to a hot, sunny climate. Postpaid: 1 lb., 60c; 2 lbs., \$1.10; 5 lbs. or more, 50c lb.

Special Terrace Mixture—for sloping places. Prices same as Southland.

Shady Spot Lawn Mixture—for shady places. Prices same as Extra Choice.

50lbs.

LOT GRAND

A Real Bargain

It is one of those surpassing values that you will appreciate all the more about seeding time. From our study of market conditions we believe that we are facing about the same situation in Sudan Grass Seed that we experienced a couple of years ago. The market was firm with slight advances up to seeding time and then the price shot skyward. Dealers failed to anticipate the demand that came and it was discovered that stocks were too small to meet it.

Markets are firm this year. Some advances have already occurred since we contracted this lot Grand. It is worth more money than we are selling it for at this time.

Quality Very Fine

The quality of course is what makes the bargain. It is new seed of high germination. Fully matured, properly cured. Free from Johnson grass. Excellent purity. In short it's the kind of seed that satisfies. When you buy lot Grand you have the double economy of a low price plus high quality. That is the combination that is making this sale a nation-wide sensation.

See page 48 for extra premiums for new customers.

A Wonderful Crop—A Very Low Price

There has never been a crop with the possible exception of Sweet Clover that has gained so rapidly in the favor of the American farmer as Sudan Grass. Its record-breaking almost unbelievable yields of high quality hay have been responsible for its widespread use. Today Sudan easily surpasses all other forage grasses in popular favor.

Nature of Sudan Grass

It is of the cane family. Finer stemmed and more leafy. A wonderful crop to stool out. Over a hundred stems have been counted on a single plant. Yields of cured hay have been secured ranging from four to ten tons per acre. Hay has fine feeding value and stock of all kinds is very fond of it. They relish it as a pasture, too, and it is used extensively in that way.

It is a warm weather crop. Should not be sown until the ground is thoroughly warm. Corn planting time or later. Sow 20 to 25 pounds per acre. Cover seed about an inch deep. You can get a more detailed description on Sudan by reading page 30 of our large general catalog. A copy of this catalog will be sent free. Use enclosed postcard in asking for it. This postcard can be mailed without a stamp. Place your order from this catalog, however, to get this special price.

MILLETS

White Wonder Millet

A revelation to those who have never grown this wonderful variety before. Fast taking the place of the German. An extra heavy yielder of fine-quality hay. You will be amazed at the enormous heads of this White Wonder. Single heads will run up to 8 to 18 inches long and contain as many as 15,000 seeds. It sure is a wonder. Yields usually half again as much as the German. Some growers say it will outyield other Millets three to one. Heavy foliage, broad leaves. It is early. Our seed quality excellent.

Golden or German Millet

This is the genuine German stock and far superior to the common millet. Yields are much heavier and quality much better. Grows taller. Heads are much larger. A maximum producer both of hay and seed. Attains a height of 4 or 5 feet on good soil. Makes a paying crop. Can be sown late and used as a catch crop. Good money in seed production. Yields up to 40 and 50 bushels per acre. Our seed is high quality new clean seed. See bargain quotation on our price list on page 24.

Russian or Siberian Millet

Not so large as German, but two or three weeks earlier. Very leafy and bushy. Prolific stooler. Cattle are very fond of it. Makes good pasture. On account of its earliness can be sown quite late. Grows 2 to 4 feet high. Makes good hay. Seeds colored reddish brown. This variety is especially popular in northern states.

Hungarian Millet

This is also known as Hungarian Grass. Yields more heavily than common. Stools freely. Requires less moisture than German. Takes 50 to 60 days from seeding to cutting. Seeds mixed purple and yellow. Many prefer this to all others. Prices, page 24.

BUCKWHEAT

Japanese Buckwheat.—Superior to common buckwheat. Stronger grower. Better resister to drought and blight. Rich dark brown seed. Thin hull, large grain. Excellent for light sandy soils or dry climate. Does well under practically all conditions.

Silver Hull Buckwheat.—Silver gray colored seed. Solid, medium sized grain. Blooms longer than the average varieties. Makes light colored flour. A fine variety for bee pasture. Very popular.

Sow buckwheat about the middle of June, three-fourths bushel per acre. Makes fine catch crop. Our selected seed is priced unusually low. See page 24.

BILLION DOLLAR

\$4.90 Per 100 Lbs. **F.o.b. Clarinda**
A Great Annual Forage Crop

The name of this crop explains its great wealth producing properties. It is an enormous producer of valuable hay. A luxuriant grower especially on rich moist soil. Grows 5 to 6 feet high and some times taller than that. Produces as high as 26,000 to 50,000 pounds of green fodder per acre. It can be used for hay, pasture or silage. It has produced as high as 12,000 pounds of cured hay per acre. No wonder it is called Billion Dollar Grass.

Adapted to Many Sections

This crop is a variety of Millet and is also called Japanese Millet. It does better in a cool climate than other millets, and therefore is a great favorite with farmers in the northern part of the United States. It also makes a wonderful production in the south if sown on somewhat moist soil, or rich land. It is not quite as good a drought resister as some varieties of millet, but for production it ex-

\$5.15 Per 100 Lbs. **F.o.b. Chicago**
 cels. The hay is palatable and the feeding value high. Many farmers have written us enthusiastic letters about the greatest crop they ever grew. Some even had pictures taken of their fields to send to us because they were so proud of their crop. It is a real money maker and you can get started now at a low seeding cost.

Other Valuable Characteristics

It is a prolific seed producer, yielding as high as 67 bushels of seed per acre. This makes a fine cash return. Most farmers who grow it want to feed the crop, however, and that usually results in a short supply of seed. Last season we sold out contracted a larger stock. This year we large, but can fill orders early. Get a start with this valuable crop. Makes hay in 6 to 10 weeks. Sow about May 1st, about 20 pounds per acre.

Seed is first-class quality and a real bargain at our Anniversary Sale price.

CANE

For Forage and Hay

A highly producer of excellent hay. Average yields 6 tons per acre. Eight up to fifteen tons of cured hay per acre are reported. Heaviest yields are obtained by broadcasting or drilled in close rows.

Value of Cane

The crop may be cut green and fed or pastured or made into hay. It is excellent summer and early fall feed. Stimulates milk flow in dairy cattle. Takes care of a lot of stock per acre. If pastured, start stock on it gradually. This is also advisable when cut and fed green. Crop may also be used for ensilage. Cane is a prolific seed producer, yielding about 30 bushels on the average with yields as high as 60 bushels being secured. Cane is a quick grower.

Amber Forage Cane

Earlier than the average. More slender stalks, and comparatively narrow leaves. Excellent hay type.

Orange Fodder

Heavier stalks and more abundant leaves. Seed heads more compact. Heavier yielder but coarser. See price list page 24.

Molasses Cane

For sorghum or molasses seed must be pure and have some very fine seed for you.

Ames Special Sorghum—Improved type of the Amber. Makes sorghum of fine flavor and color. Very juicy. **Silver Tip Sorghum**—More of the orange type. Makes a lot of extra fine quality sorghum. Very popular.

Price on Sorghum Cane: 1 lb. 25c; 5 lbs., \$1.00, postpaid. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.00; 50 or more lbs., 9c per lb.

MILLET AND RAPE

A Great Annual Hay Combination

Rape was formerly considered as unsuitable for hay. It was discovered by W. W. Bell, a South Dakota farmer, that by combining Hungarian Millet with Rape that a wonderful quality of hay could be secured. He has been using it for seventeen years and has secured wonderful results. Has yields of 3 to 4 tons per acre. Analyses higher in protein and carbohydrates than Alfalfa. Sown after corn planting time. Grows fast. Makes succulent hay. Increases milk flow. Stock likes its flavor. Cost of seeding is low. Takes 35 to 45 lbs. per acre. See page 28 of our 100 page general catalog for further information. Mail enclosed post card.

Price: 5 lbs., 85c; 10 lbs., \$1.50, postpaid. Not prepaid: 25 lbs., \$1.60; 50 lbs., \$3.00; 100 lbs., \$5.75.

BERRY'S ANNUAL PORK PRODUCER

A Quick Growing Hog Pasture

High in feeding value. Makes rich pasture. Helps develop big frames and healthy bodies in shorter time. Sow in spring or early summer. Grows only one year but works fast. Very productive. Use 40 to 50 lbs. per acre. Contains Vetch, Rape, Barley, Corn, Speltz, and Sudan. Billion Dollar Grass, Canada Field Peas, Oats, Rye, etc. Easy to grow. A money maker. Will make good production even on poorer soils and is worthy of your best land.

Price: \$3.50 per 100, Clarinda; \$3.75 f. o. b. Chicago.

Genuine Dwarf Essex Extra Fine Hog and Sheep Pasture

This crop helps cut down production costs. Builds strong big frames and healthy bodies. Reduces grain rations. Gets animals ready for market quicker. Fine for all young stock.

High Feed Value

Analyses as high as 37% digestible protein. It is unusually rich. Farmers can save money growing protein in form of Rape instead of spending so much for protein concentrated feeds.

Rape is a very heavy producer. Yields up to 12 tons of green feed per acre on good rich moist soil. Big production and high feed value make it a very profitable crop to grow. It sure saves on feed costs.

How to Handle Rape

May be sown with oats after oats are up or harrowing seed in lightly, or may be sown alone. Use six to seven pounds per acre. Sow anytime from early spring till in July. Can be pastured in six to eight weeks after sowing.

Seed Quality Important

Keep away from common Rape. Use only genuine Dwarf Essex. That is the only kind we handle. Our seed is bright, fresh, clean seed. See page 24 for Anniversary Sale prices. They will save you money.

PROSO

A Popular Grain Millet

This is also known as Hog or Broom Corn Millet. Grown more largely for grain than for hay. Seeds larger than average millets. Equal to barley for hog feed. Very early. Matures in 60 to 70 days. Also used extensively for bird feed and chicken feed. See price list.

A Bargain**

Method Of Preparation

SEED SECURED FROM BEST FIELDS

The preparation of our seed corn begins with field inspection. Only the best fields are selected. They are chosen for yield, quality and maturity. All states are carefully tested. Sorting then takes place. Poor ears are discarded. Ears kept are tipped and butted. Careful shelling next takes place. Then mechanical grading. All seed corn goes through this grading process twice, often three times. Another test is made. Each lot tagged and labelled. It is stored properly. It is shipped to each customer with a guarantee of satisfaction. Must stand up to your test. Return it and get your money back if not pleased in every way. Our aim is more and better corn per acre.

We can give but a very limited description of varieties here. Fuller description will be found in our general 100-page catalog. A copy of the same will be sent free to all wishing one. Mail the enclosed post card, without a stamp. We pay postage. Tell us what variety you are interested in. If you want to buy at these prices, however, order from this special catalog.

Main Crop Yellow

Clarinda's Big Perfection. A large eared, yellow dent, somewhat rough. A great favorite with our trade. Combines the best qualities of leading varieties. Shells out large percentage. Broad, thick, deep kernels that have a slightly reddish cast on the side. A vigorous grower. Early for such a fine large variety. Matures in around 110 days.

Pride of Iowa. The biggest selling variety we have. Similar to Reid's Dent. The grains are deeper and a bit rougher. The ears are larger. Ranks at the top as a yielder. Produces remarkably fine solid corn. Cob small considering size of the ear. Fills out well, shells out heavy. We recommend it highly. About 110 days.

Krug's Dent. An earlier variety but a phenomenal yielder. Made highest yield in test of 113 varieties. A cross of Gold Mine and Reid's Dent. Good sized ears and lots of them. Produces lots of bushels of fine quality corn per acre. 100 to 110 days.

Improved Leaming. A good producer on all soils. A tried and tested variety for over a century. Well filled ears. Deep broad grains. Medium sized red cob. Shells out well. Often used for ensilage in northern states. Quite early. Matures in 110 to 120 days.

Improved Reid's Dent. A superior strain of a well known variety. Solid compact ears, 9 to 13 inches long. Grains quite deep and set close. Straight rows well filled. Great improvement over old Reids. Rich golden color. Small cob and shank. Feeding quality very high. Season 100 to 110 days.

Legal Tender. A pure yellow corn with deep grains and small red cob. Ears extra sized. Has yielded 90 bushels per acre for John Hess in Central Iowa. Produces exceptionally well. Abundant foliage. Excellent for forage. Easy to shuck. A variety that will please you. Around 110 days maturity.

Medium Early Varieties

Berry's Golden Dent. An early yellow dent 90 to 100 days. Large ears for early variety. Fairly smooth. Well filled. Similar to Reid's Dent but earlier. Sixteen to twenty rows. Much heavier yielder than Pride of the North. Medium height stout stocky stalks. This variety is easily a leader in its class.

Iowa Gold Mine. Another fine medium early variety. About a 100 day corn. Deep yellow grain, small cob. Always gives satisfactory results. Sold under various names by different seedmen. Those wishing a medium early heavy yielding corn will make no mistake in selecting this variety.

Early Yellow Dents

Pride of the North. Especially recommended for northern customers and those wanting early feeding corn. Maturity about 90 days. One of the finest pure yellow early dents. Medium sized solid ears. Stands up well and yields surprisingly well.

Minnesota No. 13. Also in the 90 day class. Very popular; eight inch ears, often two on a stalk. Stalks quite leafy. Does well even under unfavorable conditions. One of the best producers in its class. We always have a big demand for this.

Other Excellent Early Types

Yellow White Cap Dent. We recommend this highly. A 90 day type. Nice deep kernels, sides medium yellow. Caps or tops of grains white. One of the finest early feeding varieties in existence. The kind you get enthusiastic about. Heavy producer of fine solid corn. You will be exceptionally well pleased with this one.

Golden Cap. Grains a cherry red color with yellow top or cap. Very fine appearing. Yields very heavily. Grain a little softer than average. Ears well filled. Matures up to 100 days. One of the best early feeding corns you can plant. Great favorite with stock men. Adapted to most any section of the corn belt.

White Cap Red Dent. Similar in nearly every respect to Golden Cap except color of cap is lighter and a little earlier.

Up-to-date Calico. This is the famous "Speckled" corn that has been popular for so many years. A fine feeding variety. Various strains of Calico in the market. We consider this the best. Excellent yielding, good sized ears, medium deep grains. Matures in 100 days. We seldom have enough of this variety to fill demand.

IMPROVED SEED CORN

SEED CORN Guarantee

30 Days to Test It—Your Money Back If Not Satisfied. 96% or Better Germination Guaranteed.

We take great care in the selection and preparation of our seed corn. It is all tested and labelled when shipped. You have the privilege of examining it and retesting it in any way you wish. If you do not find it as represented or if for any reason you are not satisfied you may return it, and your money plus transportation charges will be promptly refunded. We abide by your decision. There are no strings to this guarantee. We say what we mean and mean what we say. You must be satisfied.

BERRY SEED CO.

CLARINDA, IOWA

ALL BERRY SEED CORN
IS UNDER PRICED
at \$ 2.75 Per Bu.

This special catalog gives cut prices on all seed corn. They are below our regular quotations. To buy at these prices you must order from this catalog.

IMPROVED WHITE VARIETIES

White Wonder. Largest eared and heaviest yielding white corn. Ears grow 12 to 14 inches long. Good sized grains fairly rough. Matures a solid ear, and lots of them. Strong vigorous stalks. Outyields any other white corn we know of. Usually exceeds expectations of the grower. Has out-yielded other white varieties by as much as 30 bushels per acre. Around 120-day maturity.

Silver Mine. The most popular white corn we have. Pleases all who plant it. Does better on poor land than other varieties. Yields exceedingly heavy on good soil. Pure white grain and cob. Medium rough. High percentage of shelled corn stands fairly thick planting. Maturity about 110 days. We sell more of this than any one other variety of white corn. It will please you.

St. Charles White. The famous ensilage corn. White grain, red cob, clear color, large ears. A very heavy cropper. Makes quite a tall growth. Broad, succulent leaves. Used extensively for ensilage even in northern states. Produces 40 to 50 tons per acre when grown for this purpose. Grown also for mature corn. Makes high quality white stock.

Snow Flake. Large white corn. Comes between Silver Mine and White Wonder, about 115 days. Large, long ears. Medium depth grain. Moderately rough. Wonderful yielder.

Boone County White. Another good white variety. Ears somewhat shorter than Snow Flake, but larger around. Deep grains. Strong grower. 110 to 125-day variety. Not adapted to north. Pearly white color.

Silver King. Very early white. Also known as Wisconsin No. 7. Best early white. Very good yielder. Medium sized grain. An excellent choice for those wanting an early white variety. Similar to Pride of the North.

EXTRA EARLY VARIETIES

Minnesota King. A cross between a dent and a flint. Large, broad kernels, slightly dented. Deep, golden color. Eight rows. Withstands very unfavorable conditions. This in our opinion is one of the most valuable of the extra early varieties.

Longfellow Flint. Fine 8-rowed yellow flint. Long, straight, slender ears. Large, wide kernels. Small cob. Very prolific.

Silver Triumph. An excellent white flint. One of the best. Long ears often two on a stalk. Grows good sized stalks. Can be planted close and produces a lot of corn per acre. Fine for those who want real early yield. Can be planted quite late.

Sanford's White Flint. Very similar to Silver Triumph.

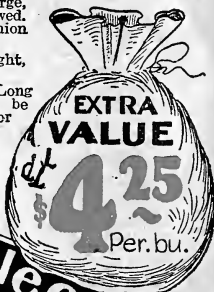

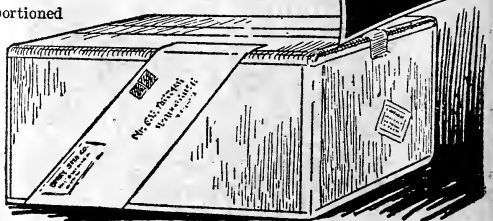

How Berry Extra Select Ear Corn is Selected and Prepared Only the Finest Ears Are Chosen for Ear Corn

When you order a crate of our ear corn you get the cream of the crop. Mr. A. R. Gorton who has been chief of our seed corn division for years, personally superintends the selection of our ear corn. You can absolutely rely upon his ear corn. We sell thousands of crates annually and it is a rarity if anyone is not highly pleased. The exceptions are usually due to an occasional shipment damaged in transit and, of course, any complaint is promptly adjusted.

To make our extra select ear corn, the ears must be properly proportioned for the variety selected. They must be well filled with straight rows. Ears must be bright, solid and clean. In short they must be first class and of the highly productive type.

Ear Corn Supply Limited

To make the standard above naturally means that only a small part of the crop will make the grade. This automatically puts a very strict limit on the supply. All orders for ear corn should be sent early. Our shelled corn will probably produce as large a yield as our ear corn, but if you wish the finest you can order a crate or two of our Extra Select ear corn. Each crate holds 70 lbs. net weight ear corn. The price on our ear corn has been greatly reduced for this "Third of a Century Sale." Order now from this book to get these low prices.

BERRY'S HYBRID CORN

Special Double Cross Strain of Selected Inbred Excels All Hybrids In Comparative Test

**OUTYIELDS

STRAINS
of COMMON
CORN
10 to 20
BUSHELS
Per ACRE**

**The Most Amazing Scientific Development in Corn That Means Millions
of Dollars to American Farmers**

What It Is

The New Hybrid Corn is produced only through years of patient and scientific work. First hundreds of ears are inbred for 3 to 6 years. Then hundreds of these inbred ears are crossed in every conceivable manner. Some of those crosses are poor, others fair and others good. It is the occasional cross that makes the enormous yields. When you know just what two or four inbred ears you have the secret, but this can only be found by years of careful scientific labor and experiment. It is the product of the cross that you plant, and that is what makes the tremendous crops.

Revolutionizes Corn Yields

When you get the right hybrid you have a variety that will far outyield even the finest open pollinated varieties. Tests in Iowa showed an increase of over 25 bushels per acre. The Hybrid yielding 127 bushels, and the best open pollinated corn just a trifle over 100 bushels per acre. Both were drilled in.

An increase of 15 to 20 bushels may reasonably be expected. And when you compare Berry's special double cross Hybrid with the kind of corn the average farmer plants, the increase should be much larger.

Berry's Double Cross Excels

Remember such a Hybrid is only as good as its cross. Hundreds of crosses are not worth planting. Our Hybrid was developed by one of the leading corn specialists in the United States. His life work is scientific corn breeding. This summer tests were made of various Hybrids near Omaha, Nebraska. Our Hybrid outyielded the best commercial Hybrids tested and it was grown side by side with the best produced in the United States. All our investigations have failed to show any single one that outyielded our seed in a comparative test.

Some Reports on Our Hybrid

In a test made near Council Bluffs, Iowa, our Hybrid produced 101.7 bushels per acre. The next commercial Hybrid 100.3, and the third 95.8. These tests were between the best commercial Hybrids in the United States. Furthermore our Hybrid showed a lower moisture content, indicating earlier maturity.

Here are parts of reports taken from the letters received from County Agents, Bankers, and Farmers:

- "Increased yield over other varieties, 20 bu. per acre."
- "Corn is earlier than Sweet Corn planted at same time."
- "A remarkable drought resister."
- "Stood up well—Did not blow down."
- "Outstripping all other corn in our neighborhood."
- "Extra strong root system. Two ears on most stalks."
- "Ears a little smaller, but lots of them and well filled."
- "Stalks shorter but will yield 10 to 15 bu. more."
- "Outyielded local corn 25%. Stands drought better."

"Surprised at the difference. Stood dry weather better. Stalks green while others adjoining were badly burned."

"Neighbors laughed at us for paying so much for seed corn. Now we are laughing as our corn is far superior to any around here."

"Did extra well on wet sandy land."

"Best corn ever raised. Two ears on every stalk and some had three."

"Every stalk had an ear on it. Other varieties have many barren stalks."

"Your Hybrid showing up best of all."

These are a few of the many reports but they will show that our claims are not based on fancy but on facts.

Think What It Means to You

When you grow more bushels of corn per acre it costs you less to produce a bushel. You make more money per acre. These increases in yields are no mere idle claims. They are facts so firmly established that the most exacting scientists give it their endorsement. A new era in corn growing is at hand. The strength of the stalks and roots, the size of the ear, and its location on the stalk, even the color of the foliage can be regulated and in this Hybrid corn those characteristics will never vary. They are definitely fixed by this inbreeding and cross breeding.

No more will you have to wonder what may show up in your field. No more will you have some weak stalks and some strong, some tall and some short. You will find our Hybrid Corn uniform, well eared, and more productive than open pollinated varieties.

What Berry's Hybrid Will Give You

You handle it just like any corn crop. All the work of detassling and crossing is done in the preceding generations. You plant and harvest like any corn crop. You will get in Berry's Hybrid a corn that can be planted a week earlier than ordinary varieties because it is bred up for hardiness. You will get a corn that matures early, about 105 to 110 days. In tests made with other Hybrids as well as ordinary corn, our Hybrid was the first of the main crops to mature.

Stalks are stiff and strong and resistant of high winds. Many stalks have two good ears. Scarcely ever will you find a barren stalk. This corn is adapted to a wide range of territory. You can go east and west with it, and as far south as you may care to go. It will give the same performance and the same heavy production. Has a strong vigorous root system. It's extremely drought resistant.

New Seed Necessary

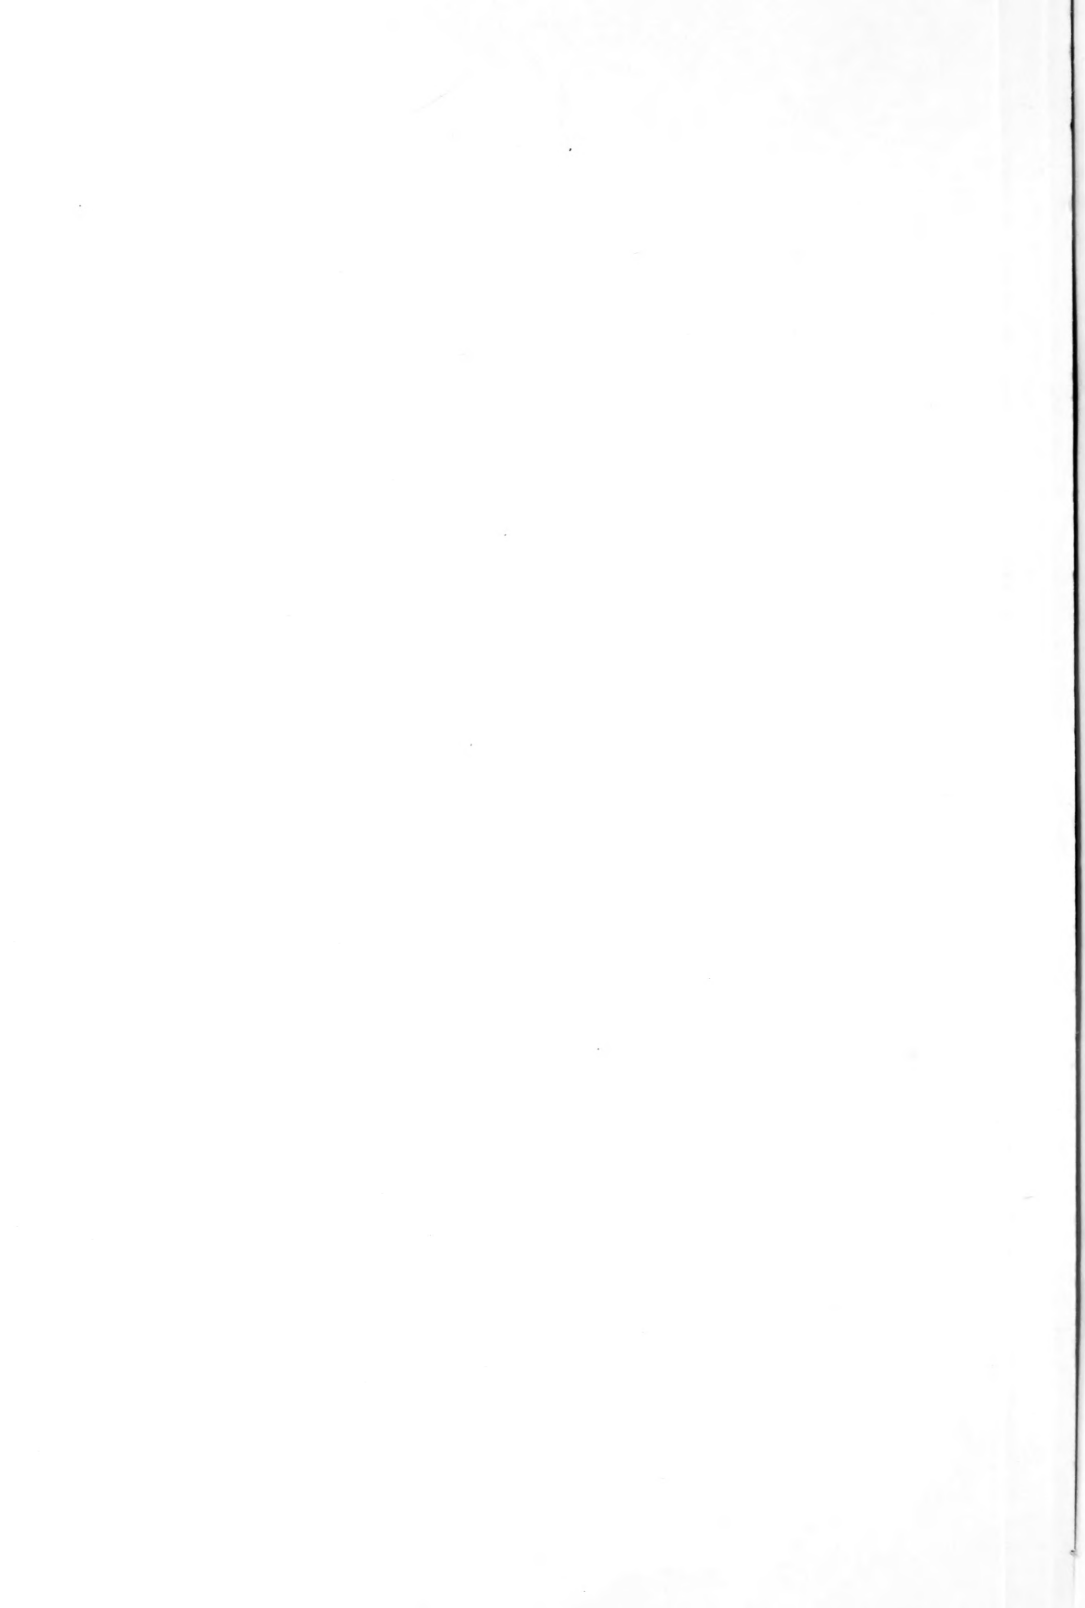

We want to explain carefully that the crop you grow should not be used for seed next year. It is our job to keep the proper inbred strains pure and to cross these selected inbreds each year in the proper way. It is only the crop from the first year that will bring you the increased yield. This means of course that you must buy new seed every year, but what does that amount to if this new seed makes it possible for you to grow 10 to 20 bushels more corn per acre.

Investment Small Considering Returns

The quantity price is \$8.00 per bushel. That means an acre cost of around \$1.00. If you get an increase of only 15 bushels per acre that means those extra bushels cost you only \$1.00 to produce or a trifle over 6c per bushel. A 20 bushel increase means \$15.00 per acre extra profit. The man who wants to be assured of getting more profit from corn cannot afford to plant any other than a heavy producing strain such as Berry's Famous Hybrid.

Special "Get Acquainted" Offer on Making More Money from Oats

BERRY'S GREAT NORTHERN

The King of all Our Heavy Varieties

The unquestioned leader for production and quality. An erect grower with straw stiff and strong and of good length. A large spreading head filled with extra big kernels. Lots of meat and therefore lots of feeding value in this grain.

A prolific stooler. Strong root system. A rapid grower. Medium maturity. Our customers often invite us to drive long distances just to see their fields. They are proud of their Great Northern and they have cause to be. They are a wonderful sight and they turn out just as wonderful as they look.

Northern Grown Seed

Northern grown stock invariably makes the largest yields and finest quality of grain. We secure this kind of seed for you so that you may have the finest and best obtainable. This seed is of course re-cleaned, graded and made into a first class seed product. Sold subject to any test. Return them and get your money if you are not pleased. You are getting value-plus in all of our seed grains and in our Great Northern you get our finest. The kind of seed that makes oat growing most profitable.

BETTER SEED BRINGS LARGER PROFITS

Thousands of dollars in extra profit could be realized by American farmers by sowing better seed oats. Seed has a much larger influence on yield than many people realize. Increases of 20 per cent and often 40 per cent are secured by using better seed. The stocks of seed oats that we have assembled for you this year are carefully selected, cleaned, and graded stock. Plump solid seed, grown under conditions that produce the best seed. A few extra cents spent for such seed means extra dollars in profits. Prices are low, quality considered.

Montana Grown Regenerated Swedish Select

These heavy yielding oats are known nearly everywhere that big heavy oats are grown. They are heavy producers of high quality grain. A white oat, medium early. Far superior to the old Swedish Select. Yields up to 100 to 140 bushels per acre reported on this variety. Seed of the type we have for you generally retails for very fancy prices. You will find the quotations on our price list placed at the lowest figures that such seed can be sold for.

We want you to sow some of these heavy seed oats of ours, and really learn what a difference in yield can be obtained by using better seed. Sow them in comparison with other varieties. Keep track of costs. The little extra money you spend for such seed comes back many times over in the way of better yields and quality.

FULGHUM

One of the newer varieties for the north. A record breaker everywhere. A yellowish oat, quite large growing on good length stiff strong straw. More resistant to smut and other diseases than the average. It has outyielded during the past 6 years every oat it was grown with such as Silver Mine, Khersons, Green Russian and even the Swedish Select.

This oat is adapted to any section of the country. In the south it may be grown as a winter oat. It is as a spring variety in the northern states that it has made such an enviable record. This oat

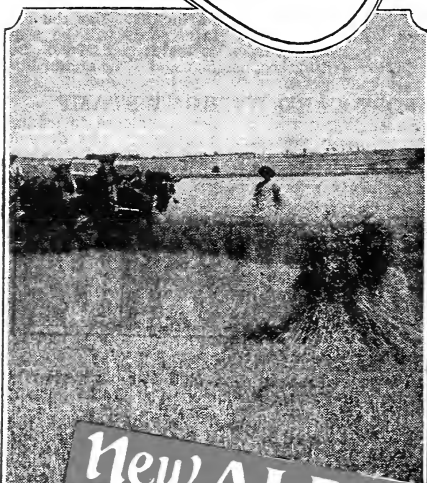

should be sown early for best results. On account of not growing so tall as the real large varieties it makes a better nurse crop for grass and clover seedings. You will find this oat a winner and a leader in the class of early oats.

RUSSIAN GREEN

A thin hulled variety with lots of meat. Color has a yellow cast with green tip. One of the best rust resisting varieties. About four days later than White Kherson. One of the heaviest yielders in early oats. Feeding value superior to the average. We recommend this oat to you as a highly profitable variety to grow. Our selected seed is re-cleaned and very fine seed.

GOLDEN RUST PROOF

A yellow oat, medium early. A wonderful yielder. Has produced up to 123 bushels per acre. An excellent rust resister. Does unusually well under unfavorable conditions. Stiff straw, narrow leaf, stands up well even on rich land. Well filled meaty grains. Fills better than the average, especially under unfavorable conditions. If you have trouble growing a good crop of oats try our Golden Rust Proof. Break away from your same old seed this year. Join the Berry family and use some of our improved seed.

New ALBERTA

A wonderfully fine big heavy northern grown oat. Large plump kernels, full of meat. Tall stiff straw. Stands up well. Matures early for such a heavy variety. A stronger grower and an oat that bears astonishing crops of high quality grain. Weighs out heavy. One of our most profitable varieties. Consider your purchase of these oats an investment, not an expense. It pays handsome dividends and makes farming more profitable. The seed will please and the prices as given on page 24 will certainly save you some money, considering quality.

Buy Better Seed for Less Money Prices Extremely Low, Quality Considered

New Iowar

One of the newer varieties of early oats. Similar to the Kherson. Just a little larger grain and a couple of days later. It grows a longer straw and is generally considered a better yielder. They were originated at Ames, Iowa, from a sixty-day variety. The fame of this variety spread so rapidly that we were literally forced to handle and sell it. Our farmers claim it is the best early oat they have ever grown. Outyields both Iowa 103 and 105. The hull of this variety is rather thin. Grain has a small, black awn. Average maturity at Ames, which is in central Iowa, was July 17th. We have some very fine seed for you and want to supply your needs.

Silver Mine

A white oat that is popular over a wide area. It deserves this popularity, for it combines an oats of superior quality with heavy yields. Medium early, ripens evenly. Medium length straw. Not very apt to lodge. Soft hull, large meaty kernels. They make fine feed.

Our seed stock is clean, bright and heavy. All of these fine characteristics of the Silver Mine makes it a desirable and profitable variety. Seed of this kind is just another one of those possibilities for making more money. Let us save you some money on quality stock.

new HULLLESS

The Oats that are all Meat and no Hull

This is a new oat to many and yet has been grown for many years. We have handled this only since an improved type was developed that has proved a winner. Our Hullless Oats are excellent yielders, and of highly satisfactory quality. The grain of these oats might be compared to rye only it is softer. They certainly are fine feed. Consider that ordinary oats are about 30 to 40% hulls which have but little feed value and you will recognize the merit of this variety.

We treat our Hullless Oats before shipping with copper carbonate to prevent smut. This treatment will not do so well for hulled oats, as the dust does not get to the kernel. You get from this seed the finest and best prepared hullless oats on the market. Grow some of them. They will be a revelation to you. See price list.

White Kherson

A very early white oat. Grains medium size. While not a large variety it is an extra heavy producer. Stands up on rich, strong land. Matures early, getting out of the way of unfavorable conditions such as blight and rust. Stools well, which, together with smaller size of grain, makes 2½ bushel per acre a good seeding. Makes a fine nurse crop for grass and clover seedings. Wherever conditions require an early oat our selected White Khersons give satisfactory results.

Iogold

A newer variety and a very valuable one. Very early and an exceptional yielder. One grower reports 70% larger yield than Khersons and matured even earlier. Highly rust resistant. Strong stiff straw. Excellent for rich land and one of the best producers on poorer soil. Generally increases yields over average oats 10 to 20 bushels per acre. It pays to sell or feed your own oats and invest in better seed. It means more profit dollars for you. Our Iogold seed stock is extra nice.

Superior Iowa 105

A real early variety. Medium size, light yellow grain, well filled, plump and heavy. Stands up better than any other variety on extremely rich soil and under adverse conditions. It yields astonishingly large crops.

This oat is also an Iowa variety, being originated by Prof. S. C. Burnett of the Iowa Experiment Station at Ames. It occupies a high rank in the favor of farmers in many states. It has proved itself adapted to all sections where spring grains are grown. Southern farmers like it because it yields well and makes a nurse crop of the finest kind.

This carefully cleaned and graded stock is a far superior article to what many farmers sow. If you want maximum yields you must sow superior seed.

Early Champion

This also is an extra early variety. Sometimes called the "Fourth of July" oat as it is out of the way very early. A remarkably fine nurse crop. Many dairy men grow this variety and feed it in sheaf. It is a good yielder. Is adapted to practically any type of soil and exceptionally good for clay or light soils. Produces better on soils of low fertility than any other variety.

These Early Champions are deserving of widespread use. While they will not yield equal to the larger later varieties they will, under conditions existing on many farms, be extra profit makers. Our seed is all recleaned graded stock. It is carefully prepared and a product that will satisfy you. Start this year with better seed. Take advantage of our sale prices and order from this special catalog.

OUR BARGAINS MUST BE THE LARGEST OR YOUR MONEY BACK

The Key To Better

SPRING GRAIN PROFITS

Barley has unquestionably proven its superiority over other spring grains as a feed producer. No other cereal excepting corn will yield as many pounds per acre. It makes the extra fine feed. The acreage of Barley has increased rapidly in the past few years. Last year there was more Barley sown than ever before and 1929 will show a big increase over 1928. With improved varieties, such as we offer you here, you can get extra profits, for they are extra heavy producers.

CHAMPION BEARDLESS BARLEY

This is the most popular variety we have. The tremendous demand for it exhausts our stocks every year before the seeding season is at hand.

Having no beards it is a very pleasant grain to handle. The straw has greater value. It is a very early variety and an extra heavy yielder. It is the kind of a crop farmers get enthusiastic about. A field of this Barley is a beautiful sight. The heavily filled beardless heads droop slightly with their rich loads of muscle-building, bone-developing and nerve-forming foods. In harvest time it turns out just as good as it looks.

Good Supply on Hand Now

We contracted the largest stock of Champion Beardless that we have ever had for this greatest of all seed sales with which we are celebrating our thirty-fourth anniversary. And we have priced it at a figure that makes every penny count. We ask all who want this wonderful Barley to place their orders early, for while our stock is large now it will not last throughout the season.

WHITE HULLESS BARLEY

The kind that has no hulls or beards

This remarkable variety shells out a grain like wheat. Hard, plump, solid grains a little larger than wheat kernels and lighter in color. Makes one of the finest feeds you can use. Each grain is packed with life-giving, healthful food elements. Makes extra fine hog feed. Like Champion Beardless, it is early. Gets out of the way of unfavorable conditions that often harm small grain late in the season. White Hulless is also an excellent drought resister. The leaves are broader than on other barleys. It is often used as an early hay crop.

Extra Profits

Farmers who are the first to grow this variety in their neighborhood usually sell most of their first crop at a premium to their neighbors for seed purposes. Many do not care to sell any of it, for they find it an extra good and economical producer of pork. White Hulless makes heavy yields and that means extra profits, too.

Sowing high-grade cleaned seed such as we have contracted for you is an assurance of the most satisfactory results possible. Seed weighs out 60 to 63 pounds to measured bushel, but quotations are on the same basis as other Barley, viz: 48 pounds to bushel. Our large 100-page catalog tells more about this great variety. Use the enclosed postcard and get this catalog free. Order from this catalog, however, and get the advantage of the cut prices on page 24.

VELVET BARLEY

The Barley with Beards Like Silk

One of the newer varieties that is taking rapid strides to the front, and promises to stand at the head of the list in another year or two. As a yielder it doesn't take a back seat for any variety. It usually tops the list.

While this variety has beards it is entirely different from any of the old bearded sorts. You may know something of the rough, "sticky" beards of those old kinds. The beards on Velvet are as smooth as straw. No barbs at all. It's just as pleasant to handle as the beardless kind.

Beards Claimed an Advantage

The presence of beards seems to act as a protection to the grain and is especially helpful under hot, dry weather. This may be one of the reasons for its heavy yielding record. The grain resembles the Champion Beardless. This variety is unusually resistant against disease. There is good money, too, in selling this Velvet for seed while the supply is still limited. We recommend it to you as a money-maker second to none. Now is a good time to start with this variety, while you can get our special prices.

ODERBRUCKER

This is one of the older varieties of Barley, but an improved type. One of the heaviest producers. A grain of high feeding value, high in protein. Very early. Disease resistant. Strong straw. An excellent nurse crop for grass and clover seedings. This Oderbrucker is always on the job producing its extra rich feed in great abundance. On account of larger supply the price is lower and makes a very economical seeding. Around two bushels to two and a half bushels per acre is the general seeding.

SPELTZ

Also Called Emmer

This is a most remarkable grain crop. It is a very hardy spring grain crop, a good yielder and a grain of very high feeding value.

Speltz resembles barley somewhat, only the grain is larger and broader. The hull or shuck is not so tightly attached to the kernel. When you remove the hull you find two kernels similar to rye. It makes wonderful feed. Both the husk and the kernel contain rich food elements. Plenty of protein and mineral that make it one of the finest grains to feed.

Other Valuable Characteristics

Speltz is the best drought resisting grain in this country. It outyields practically every other small grain crop. It matures very early. It stands up remarkably well and seldom, if ever, lodges. That makes it an admirable nurse crop for grass and clover seedings and also makes it a grain that can be grown on rich land.

It does not require rich land, however, for Speltz, as it makes very good crops even on poorer soils. The crop can be sown as early as the seed bed can be prepared. It will stand more frost than other spring grains. Sow 2 bushels per acre. Can be sown with a drill or handled like any spring grain crop. Speltz also makes good hay when cut green.

Heavy Demand for Speltz

We are selling more Speltz every year. Farmers who are looking for a grain crop that is more profitable than common oats are enthusiastic about Speltz. While they usually have an opportunity to sell their first crops for seed, they are loathe to part with it after they learn its excellent feeding value.

The disease resistant qualities of Speltz is another point in favor of this remarkable grain. You may have heard about this grain before. Now is an excellent time to start with it.

Price Very Low on Fine Quality Seed

Our Speltz seed is another of the famous seed values that is making our "35th Anniversary Sale" such an important chapter in the history of the seed business. Bright, plump, re-cleaned, high germinating seed from heavy producing strains makes a seed value that is bound to satisfy. A high-quality product always satisfies.

We are selling our Speltz seed on the close margin that is creating such a sensation in the seed world. What we lack in percentage of profit we figure will be made up by a tremendous gain in the volume of sales. See price list for wholesale quotations.

Buy Better Seeds for Less Money

Some will tell you it can't be done, but here in our values is the indisputable proof that we are doing it. When you receive your shipments from us you will be absolutely convinced. If you are not you can return your shipment and get your money back, plus freight, and you are out nothing.

The first pages of this catalog explain why we can make big money-saving offers. All these other pages show you that we do actually make your seed dollars 10 per cent to 25 per cent bigger. The quality of the shipment will convince you that you couldn't get a similar value elsewhere for the money.

35th Anniversary
SALE

SPRING WHEAT The Famous New Marquis

This Wheat is being grown with wonderful success in sections where spring wheat is not ordinarily grown. It is earlier than most varieties and, therefore, escapes the unfavorable conditions that often damage later varieties. We handle only northern grown seed, which is an important favorable factor in quality. Southern seed is not earliness, yield and although it can be secured at lower prices. We advise against using it.

Character of New Marquis

It is beardless or smooth-headed wheat. The kernels are short and very plump. Color quite dark and a hard variety. It stands in front rank as a yielder, and is one of the finest milling varieties. The seed we have is truly beautiful stock. There is a great we have is truly beautiful stock. There is a great difference between the results you can secure from this seed and most other spring wheat. Sow it as early in the spring as possible. Use 1 1/2 bushels per acre.

Our New Marquis is one of those better money-making spring grains. Don't continue with unprofitable kinds. They lose you money. Invest in the re-cleaned northern are very low for such extra siders. We always save you money. Quality considered. Buy during this value-giving sale.

SPRING RYE

This crop, while new to some, is a very fine grain crop. Makes excellent yields on all soils and one of the finest spring grain crops for poor land. Grains almost identical to winter Rye. Growing crops look alike. You sow spring Rye like any other spring grain crop. Use about 1 1/2 bushels per acre. Sow as early in the spring as seed bed can be prepared. Crop very hardy. Stands lots of frost damage.

Value of Spring Rye

Spring Rye grows a good length straw. Yields reported up to 40 to 60 bushels per acre. Also used extensively for hay and pasture. Makes an excellent combination with Canada Field Peas or Vetch. Can be pastured for a while and then left for a grain crop. Also good for plowing under to add humus to sandy soils. See page 24.

High Quality New Crop

Recleaned Tested and Guaranteed

High Purity Strong Germination

SOY BEANS

A BIG MONEY CROP FOR SPRING PLANTING

Soybeans, Soybeans and more Soybeans seems to be the call of the American farmer. There are excellent reasons for the great increase in Soybean growing. As a cash crop they are far superior to oats as the beans produce 20 to 30 bushels per acre, worth \$1.75 to \$2.50 per bushel. Soybeans are soil builders, too. They make fine hay, equal to Alfalfa. Soybeans in corn for hogging down is one of the most economical means of producing pork. Inoculate Soybeans.

Superior Quality Seed—Best Standard Varieties Specially Priced for this Great “Anniversary Sale.”

DUNFIELD

A bright pure yellow bean. Heavy producer of mature beans. Makes a very fine hay variety and for hogging down. This is one of the newer varieties developed by the Iowa Experiment Station. We consider this one of the best all purpose beans and recommend it to you highly. Our stock is the finest Soybeans we have ever seen. But order them early.

MANCHUS

Another excellent all-around bean. Well known to most farmers and recommended by County Farm Advisors. Light yellow bean with dark seed scar. Heavy producer and strong grower.

MORSE EARLY GREEN

Especially fine for hay in all sections and good seed producer in southern part of Iowa. Beans do not shatter readily. Makes a fine growth of vines. Very popular.

EARLY BLACK WILSON

Small seeded black bean. Very nutritious. Becoming very popular.

VIRGINIA

Slender stems. One of the best hay beans. Small brownish colored seeds. Takes fewer pounds per acre. Adapted to practically every soil.

BLACK EYEBROW

A mottled brown seed. Grows 36 to 40 inches. Matures in about 120 days. Good for hay or beans.

MIDWEST OR HOLLYBROOK

Heavy seed producer. Also fine for hay. Matures 120 days. Very desirable for hogging down.

ITO SAN

Best of the earlier varieties. Stalks shorter and beans a little smaller. Color yellow. Grows very erect. Bears large quantities of beans. Excellent for north or where early variety is desired.

See Special Sale Prices on page 24

ALL PRICES
Cut Severely

35th Anniversary
SALE

VETCHES

SAND, WINTER OR HAIRY VETCH

A legume. A soil builder adapted to all soils. Especially good for poor, sandy soils. Not sensitive to acid. Should be inoculated. Makes excellent feed, high in protein. May be sown in spring or fall. Lives over one winter. Sow 20 to 25 lbs. per acre, 50 lbs. to bu. Use for hay or plowing under.

We have assembled for this great sale event as fine a quality of genuine Sand Vetch as we have ever handled. Fresh, live seed. Recleaned, tested and guaranteed. Don't confuse this with common Vetch, as it is far superior. Refer to our Wholesale Bedrock prices on page 24.

SPRING VETCH

One year crop. Can only be sown in spring. Should be sown early especially in south, as it needs a cool growing season. Seed larger than Sand Vetch. Takes about 40 lbs. per acre. Inoculate for best results. Extensively used where early crop is wanted for feed or plowing under. Feeding value very high. Also a good soil builder.

CANADA FIELD PEAS

One of the best crops available for real early hay, pasture or green feed. Sow real early. Cover fairly deep. Some oats usually sown with it. Pea hay is high in protein. Feeding value very high. Hard to beat for an early crop. We have the genuine White Canadian Peas for you now. Prices very low. We save you good money.

COWPEAS

A Legume of High Merit

They are one of the greatest annual soil building crops. A crop of cowpeas plowed under makes quickest improvement in soil fertility.

For hay or green manure use 1½ to 2 bushels per acre. Can be grown in corn in place of Soybeans. Do not plant before corn planting time.

HIGH GRADE SEED

Our customers, both new and old, will be delighted with the quality of our Cowpea seed. It is bright and clean and high germinating. We have priced this stock as low as we can possibly sell seed of such high character.

WHIP-POOR-WILL

An early maturing variety of cowpeas about 70-80 days. Very, very popular. Makes a heavy growth of foliage. Rather a bushy variety. Our trade takes more of this kind than all other varieties combined. Hard to beat for a general purpose pea. You will be well pleased with it.

NEW ERA

Earliest variety of cowpeas. A favorite in the northern states. Often planted after grain harvest, for plowing under in fall. Upright growing and prolific. Seed smaller in size. One bushel per acre makes good seeding.

MIXED COWPEAS

Extra heavy growth can be secured from mixed peas. When large yield is desired for pasture or plowing under they make a desirable seeding. Mixed seed can be had at somewhat lower price. See price list.

Seed Potatoes

Grow More Bushels From Fewer Acres

Selected Northern grown seed potatoes are far superior to southern or home grown stocks. This has been proven hundreds of times in demonstrations and farm experiments in all parts of the United States. Nearly every experienced potato grower knows this. Knows that better northern seeds will bring him a much larger yield per acre. It may double production and the quality is far better.

You can buy the finest seed stock at very low prices during our "35th Anniversary Sale." Now is the time to change your seed while prices are at their lowest points. Our seed is Red River Valley stock carefully selected, and is guaranteed to satisfy.

RED RIVER OHIO

Extra early. A good keeper. Light pink skin. Pure white flesh. Eyes near the surface. Very little waste in peeling. Vines grow upright, easy to cultivate. Tubers are in a compact clump making digging easier. Potatoes grow to good size. It is an old favorite variety.

You doubtless have grown Ohios before, but there are many who read this that have never planted as fine or as heavy yielding seed stock as our Red River Ohios. This northern grown seed will mature a crop about two weeks earlier than the average home-grown stock. You get quick-growing potatoes that make the heaviest yield and finest quality.

BANNER

A superior variety of medium late potatoes. Makes smooth, handsome, creamy white potatoes. Excellent table quality. Strong eyes set on the surface. Skin slightly nettled. Splendid cooker. Remarkable disease resister and stands drought better than the average. Splendid keeper and an enormous yielder. This variety is a general favorite main-crop variety. You'll like them.

CARMAN NO. 3

Famous for its heavy yields. Produces very few culls. Skin and flesh white. Few eyes, which are shallow. No hollow hearts or dark spots. This, too, is a main crop variety. Carman No. 3 is one of our most popular varieties of the late type. Our seed stock will give you far better satisfaction than the average seed you might plant. It's an excellent variety.

RURAL NEW YORKER

A variety that has a host of friends. It's a dandy. A main crop or late variety. Very smooth. Shallow eyed. Produces heavily. Good drought resister. Highly prized for its excellent keeping qualities. Very choice eating stock. Get a start of this most desirable variety. We will send you selected seed. All northern grown. Produces bigger and better crops.

BERRY'S IMPROVED BONANZA

Here's something superior to the old Bonanza. A little larger, a better yielder. We consider this our best medium late red-skinned variety. Very white flesh of fine texture. Cooks dry and mealy. Vigorous vines. Best disease resister and withstands drought better than others. We consider it the best yielder, finest keeper and best shipper. Combines more good points than any other of its type. We urge you to include this in your order. Our prices low and quality high.

SPAULDING RED ROSE

Medium late. Color, dark red. Shape, long and large. Flesh very white and mealy. Heavy yielder. A hardy variety. Strong, vigorous foliage that resists disease and insect damage. Its heavy yields make it rank high in popular favor. A fine money-making variety, especially when high-grade northern seed is planted.

SIR WALTER RALEIGH

One of the chief main crop varieties in this country. Pure white in color. Round to oblong in shape. Grows to large size. Finely grained white flesh. This potato attains front rank with its fine quality and large yields. We always have a heavy demand for these.

All varieties are standard and first class. See price list for quotations.

BERRY'S GENUINE IRISH COBBLERS

These are potatoes that should be in every garden. It will produce more and better potatoes than many you have grown before. They excel in quality and yield the old Peachblow we used to handle. It is by far our most popular variety. If you want a potato crop to be proud of plant some of our famous Genuine Irish Cobblers.

Description

White skin and the flesh is pure white. Looks nice and is a wonderful eating potato. Cooks very dry and mealy. Its quality can hardly be excelled. Yields are astonishing. Early potatoes bring best profits with such heavy yields.

It is a smooth potato with somewhat deep-set eyes. Tubers quite large. Round to oblong in shape. The family will be delighted with their fine quality and for the same reason they are very popular with the trade. Be sure to include some of our fine Irish Cobbler stock in your order. We know you will be exceptionally well pleased.

All Our Potatoes Low

See page 24 for our money-saving sale prices. These quotations are made on the kind of seed stock we know will give you the highest type of satisfaction. We will order any seed returned that does not please in every way. Let us help you grow more and better potatoes on fewer acres.

YOU MUST BE SATISFIED OR YOUR MONEY WILL BE CHEERFULLY REFUNDED

CANNAS

Give Tropical Effects

No home is complete without them. Set out in the spring. Dig up in the fall. Replant next spring, etc. We will ship you every select stock. Our prices will save you money.

All Prices Postpaid

2202 Florence Vaughan. 4 1/2 feet. Green foliage. A renowned yellow Canna.

2203 King Humbert. 4 1/2 feet. Bronze color. Flowers measure 5 to 7 inches across.

2205 President. 4 feet. Green foliage. Color rich, glowing scarlet. Free bloomer.

2210 Yellow King Humbert. 4 feet. Dark green foliage. Deep, rich yellow flowers, softly spotted with bright red. Large flowers.

Above four varieties, 15c each; 3 for 40c; doz., \$1.40.

2201 Buttercup. 2 1/2 to 3 feet. Green foliage. The best dwarf yellow. Flowers a pure buttercup-yellow.

2204 Mrs. Alfred Conard. The large, exquisitely shaded salmon-pink flowers are produced on robust, upright stalks. 4 feet.

2206 Richard Wallace. 4 feet. Canary-yellow flowers. Very floriferous.

2207 Statue of Liberty. 6 to 7 feet. Flowers blazing flame-red. The foliage is of a rich, luxuriant bronze shade. Large leaves.

2208 Wintzer's Colossal. 5 feet. Without a doubt the largest flowered canna yet produced. Flowers of vivid scarlet.

2209 Wyoming. 5 to 6 feet. Bronze foliage. True orchid-flowered variety. The massive orange-red flowers make a strong contrast with the rich, dark foliage.

Above six varieties, 20c each; 3 for 50c; doz., \$1.75.

Berry's Special Canna Offer

2215 One each of the above 10 superb varieties, postpaid, \$1.50.

Mixed Large-Flowering Cannas

2220 Our selection, 3 for 40c; doz., \$1.50; postpaid.

Canna Bed Collections

2225 For a 7-foot bed, 19 plants, 1 in center, 6 in second row, and 12 in the outside row. Best selected named varieties. Price for 19 bulbs, \$2.25.

2230 For a 10-foot bed, 37 plants—1 for center, 6 for second row, 12 for next row and 13 for outside row. Large flowering, selected named varieties. 37 bulbs for \$4.00, postpaid.

Hints on Canna Beds.

If planted in circular beds put the taller ones in the center and lower growing varieties towards the edge. In rows the taller ones should of course be at the back. Some low growing flowers or plants along the outer edge make a very effective frame for the Canna bed.

DAHLIAS

All Beauties—Excellent Quality—Postpaid Prices

Save On Roses

The beauty of roses is one of nature's rarest gifts to mankind. Delicately shaded, delightfully perfumed and exquisitely formed, they make a flower that everyone loves.

The varieties listed below are selected for their beauty and their adaptability to the needs of our customers. The tea roses do best with some protection over winter, all other varieties are very hardy. The stock is strong and healthy and of the size that usually starts the easiest and gives the most satisfactory results.

The prices are low for the quality of stock supplied. Roses are scarcer than usual this year. Place your orders early. Late buyers should send in a second choice.

Hardy Hybrid Perpetual Roses

Your selection from any of these varieties, 3 for \$1.00.

2100 Anna De Diesbach. Bright, clear pink, especially fine in the buds.

2101 American Beauty. The Queen of crimson flowers.

2102 General Jacqueminot. The flaming scarlet rose of Romance.

2109 George Ahrends. Large pink flowers borne singly on the point of stem.

2103 Frau Karl Druschki. Acknowledged by all to be the most perfect white.

2104 Paul Neyron. Bright, rosy pink. The largest rose known, often as large as a saucer.

2105 Ulrich Brunner. Cherry red, a rare color. Large petals.

2106 Soleil D'Or. Golden yellow shaded nasturtium red.

2107 Mrs. John Laing. Large pink flowers. Extremely fragrant, borne on long stems.

2108 Margaret Dickson. White with flesh center.

Everblooming Hybrid Tea Roses

Your selection from any of these, 3 for \$1.00.

2111 General MacArthur. Brilliant crimson; splendid for bedding.

2112 Golden Emblem. Best yellow bloomer; blooms constantly.

2113 Gruss An Teplitz. Red rose in a class by itself, because it bears three times as many blooms as any other. Ironclad for hardiness.

2114 Kaiserin Auguste Victoria. Pure white and a time-tried favorite.

2115 Killarney. The beloved Irish rose, especially beautiful in the bud.

2116 Mme. Edward Herriot. Buds are coral red and the open rose a lovely apricot.

2120 Lady Hillingdon. A fine, free-flowering rose. Has long, pointed buds. Colored a deep apricot yellow shading to orange.

2121 Los Angeles. The long, pointed buds open into beautiful formed flowers rich in fragrance. Flame pink, toned with coral and shaded with gold.

2117 Ophelia. A delicate salmon pink toned with rose. A flower that excites the admiration. Flowers open full and double. Blooms profusely all summer.

2119 Red Radiance. Pure red; foliage growth and habit same as in the parent Radiance.

2118 Sunburst. Brilliant, orange-copper; long stemmed, vigorous.

2122 Crusader. Rich, velvety crimson.

2123 Columbia. Large, Peach Blossom pink.

2124 LaFrance. Bright Satiny pink.

2125 Mme. Butterfly. Pink shading to golden yellow.

2126 Mme. C. Testout. Satiny pink and silver.

2127 Pink Radiance. Brilliant rosy carmine pink.

Hybrid Rugosa Roses

Your selection, 3 for \$1.00.

2150 Belle Poitevine. The blooms are large and full, the petals gracefully in-curved. Bright, clear, lively pink.

2151 Hansa. Double reddish-violet flowers of large size. Hardy.

2152 Sir Thomas Lipton. White, double flowers. A continual bloomer.

2153 F. J. Grootendorst. Beautiful small red flowers. Blooms all summer.

2154 Conrad. F. Meyer. Double, clear, silvery rose.

Hardy Climbing and Rambler Roses

Your selection, 3 for \$1.00.

2130 Dorothy Perkins. Pink clusters of pink blossoms with crumpled petals, glossy foliage.

2131 Excelsa. Red, double glossy foliage which never mildews or spots. Extremely vigorous.

2133 Crimson Rambler. One of the oldest and best.

2132 Gardenia. Best yellow, but not as perfect as the pink or red ones. Flowers are double.

2134 Paul's Scarlet Climber. Rapid grower with wonderful double scarlet blooms.

2135 Seven Sisters. Varies from rosy red to bluish white.

2136 Climbing American Beauty. Deep rose-pink.

2137 Christine Wright. Bright rose pink.

2138 Silver Moon. Silvery white with yellow stamens.

Baby Ramblers

Your choice, 3 for \$1.00.

2142 Baby Dorothy. A prolific producer of pure pink flowers.

2143 Catherine Zeimet. Pure, snow-white, double in protuse clusters. Foliage dark, glossy.

2144 Orleans. Brilliant Geranium-red suffused rose and deep cerise.

2145 George Elger. Golden coppery changing to clear yellow when in full bloom.

Vines Add Charm and Beauty

2801 Virginia Creeper or American Ivy. This is a favorite with many. Its deeply cut green leaves turn to crimson in the fall. Perfectly hardy everywhere. Grows in practically every soil. Must be tied up. Will not cling to walls. Price, 25c each; 3 for 70c.

2802 Bittersweet. Very hardy, grows in sun or shade. Yellow flowers in June, followed by bright orange and scarlet berries in fall and winter. Easy to grow. Price, 35c each; 3 for \$1.00.

2803 Boston Ivy. Small-leaved variety. One of the finest hardy climbers. Clings firmly to smooth surfaces. Makes a wall of green that changes in fall to bright crimson and yellow. Does not have to be tied. Price, 50c each; 3 for \$1.40.

2804 Dutchman's Pipe. A truly remarkable vine. Large, heart-shaped leaves. Makes a very dense screen of foliage. Thrifty grower and hardy. Brownish flowers are pipe-shaped. Leaves have a shingle-like arrangement. Does best on north side of house. Price, 60c each; 3 for \$1.50.

2805 Engelmann's Ivy. Clings to walls and trees by means of tendrils like the Boston Ivy. Foliage resembles Virginia Creeper, but is smaller and denser. The hardest of all. Price, 30c each; 3 for 80c.

2806 Trumpet Vine. A hardy native vine. Robust grower. Trumpet-shaped orange-scarlet flowers. Light green leaves. Price, 30c each; 3 for 80c.

2807 Wisteria (Purple). A very handsome climber. Attractive foliage. Flowers are borne in magnificent purple clusters. Exceptionally desirable for porches, pergolas and trellises. Price, 60c; 3 for \$1.50.

2808 Honeysuckle (Scarlet Trumpet). Rapid grower. Excellent vining qualities. Fragrant flowers. Will thrive in shady places. Price, 30c each; 3 for 80c.

ORNAMENTAL SHRUBS

Extra Nice Grade and Quality

A little money invested in ornamental shrubbery pays big returns. It adds to the value of your home many times what it costs.

Feel free to write us for suggestions. If your requirements are large send us a list of your needs and we will gladly quote you. Place your orders early and be assured of getting just what you want. Shipment will be made as soon as weather conditions permit in the spring.

3100 Almond, Pink Flowering. Pretty dwarf bushes that produce small pink flowers. 18-24 inches, 50c each.

3101 Almond, White Flowering. Same as above except flowers are white. 18-24 inches, 50c.

3103 Althea (Rose of Sharon). Practically everblooming. Large flowers in red, white or purple. 18-24 inches, 30c each.

3102 Barberry (Japanese). Has glossy, green foliage changing to coppery red in the fall. Attractive yellow blossoms and little red berries which hang on all winter. 30c each; 3 for 75c; 10 or more 20c each.

3104 New Red Leaved Japanese Barberry. Similar in all respects to the green-leaved variety except the foliage is a rich lustrous bronze red, becoming more and more brilliant as time goes on until it changes to a vivid orange in the fall. 12-18 inches, 75c each.

3105 Calycanthus. Flowers very double, of a purplish brown color and very fragrant. Sometimes called "Sweet-scented Shrub." Blooms most all summer. 18-24 inches, 65c.

3106 Cydonia Japonica (Japan Quince). Called Firebush because when it is in full bloom it is just like a blaze of fire. Very hardy, has little thorns on; about 6 ft. 45c each. 2-3 ft. size.

Deutzia

3110 Lemoine. Dwarf. Large, pure white flower. Cone-shaped heads. Postpaid, 60c each; 3 for \$1.50.

3112 Rosea. Single Pink. Blooms in June. Very generally grown. 30c each; 4 for \$1.00.

3113 Pride of Rochester. Is tall. Growing higher than one's head. Pure white flower. Postpaid, 30c each; 4 for \$1.00.

Dogwood

3121 Cornus Sibirica. This has a real bright red bark. Foliage is dark green, flowers creamy white. Postpaid, 30c each; 4 for \$1.00.

3123 Yellow Barked. Same as cornus except for the bark which is yellow. Plant some of both. 50c each; 3 for \$1.25.

3124 Variegated. Purplish red branches. Silver variegated foliage. Excellent for mass planting in ornamental landscape jobs. Postpaid, 50c each; 3 for \$1.25.

Elder

3130 Golden. Has a green background. It is one of the very finest of golden leaved shrubs. 35c each; 4 for \$1.00.

3131 Cut-leaved. Leaves are deeply cut which gives it a beautiful fernlike appearance. Grows 6 to 8 feet tall. Postpaid, 30c each; 4 for \$1.00.

Forsythia (Golden Bell)

3133 Earliest shrub to bloom. Covered with golden yellow bell-shaped flowers before the leaves. 30c each; 4 for \$1.00.

High Bush Cranberry

3135 Similar to the Snowball, but bloom is more open and spreading and is followed by cluster of scarlet fruit like cranberries. Postpaid, 40c each; 12 for \$4.25.

Hydrangea

3140 Paniculata Grandiflora. Blooms in August. Flowers immense cone shaped trusses. Best results are obtained in partial shade.

3141 Arborescens Grandiflora. Flowers like Snowballs, pure white, except larger. Postpaid, 50c each; 3 for \$1.25.

High Grade Pruning Shear. Made by one of the foremost tool makers in America. 9-inch size. 95c postpaid.

BEAUTIFY YOUR HOME AT A LOWER COST NOW
SPECIAL LOW SALE PRICES

NATURE'S FINEST TREATS

Now Obtainable at LOW COST

MASTODON STRAWBERRY

Wonderful, Newly Developed Strain. Get the Genuine. Nationally Advertised Mastodon. Here it is.

MASTODON—The wonderful new Everbearing Strawberry. Enough cannot be said for it. Under ordinary field culture it has produced at the rate of 350 16-quart crates per acre the same year it was planted. Its great size and luscious flavor are greatly in its favor on the market. It will bring far better prices than the older everbearers because of its beauty and enormous size. It is unapproachable; you should start your Mastodon bed at once—it will reap fine profits for you.

Postpaid—25 plants for 90c; 50 plants for \$1.40; 100 for \$2.45.
Not postpaid—200 for \$4.00; 500 for \$7.50; 1,000 for \$13.95.

IMPROVED PROGRESSIVE—It is a heavy fruiting type. The berries are firm. It is a good shipper and we recommend it for every garden, as well as for commercial growers. Self fertilizing. It is a berry that is hard to equal.

CHAMPION—Big berries, rich in flavor and produced in great abundance. Long roots, good drought resister and a heavy yielder. In some respects superior to the Progressive. Tested and proven a remarkable kind. The two above varieties are priced as follows:
Postpaid—25 plants for 70c; 50 for \$1.15; 100 for \$1.85; 200 for \$3.35.
Not postpaid—500 for \$8.00; 1,000 for \$15.00.

RED GOLD

Red Gold is a revelation in spring varieties. Enormous size. Some measure eight inches around. Color is shining red. They do not contain the acid found in common varieties. Require less sugar, excellent for preserving. Fruiting season thirty days.
Postpaid—12 for \$1.00; 25 for \$1.75; 50 for \$3.00; 100 for \$5.00.

SENATOR DUNLAP

A favorite wherever tried. There are a few kinds a trifle earlier but they do not produce such fine fruit. It is early. The fruit is large. Color is a deep, rich red. It has the most delicious, sprightly flavor. Plant will withstand a lot of hardships. It is highly productive. The berry is a good keeper and an excellent variety for commercial gardeners. Self-pollinating.

GIBSON

Medium late. Berries large, beautiful dark red in color, vigorous grower and very productive. Bears through a long season, grows well almost anywhere. Not a shipping berry, but its high quality makes it very good for home garden or local market.

DR. BURRILL (The Million Dollar Strawberry)

You, no doubt, have heard of this famous variety. It is without question a wonderful berry. Vigorous growing, drought resisting, and long rooted. A little later than the Dunlap. Large, delicious, dark red berries. A "perfect" variety.
Postpaid—Above 3 varieties, 50 for 60c; 100 for \$1.00; 300 for \$2.75. Not postpaid—200 for \$1.50; 500 for \$3.25; 1,000 for \$6.00.
Ask for prices on larger quantities.

BLACKBERRIES

3700 Eldorado. Hardy. berries are large, jet black, in large clusters.

3701 Early Harvest. The earliest variety. Fruit rather small and sweet. Not recommended for the North, but does well in Missouri, Kansas, Southern Iowa, etc. It is an old standby.

3702 Snyder. The old standby. Very hardy, thrifty and vigorous growing. Berries are borne in large quantities.

Prices postpaid—10c each; 10 for 75c; 50 or more, 6c each.

RASPBERRIES RED

3725 Latham Red. An extra hardy red Raspberry from Minnesota. Extra good.

GRAPES

3775 Concord. Variety grown for market the country over. Needs no description.

1 yr., 12c each; 10 for 95c;
2 yr., 18c each; 10 for \$1.35.

3776 Moore's Early. Very fine for market purposes. Ripens 10 days before the Concord.

1 yr., 15c each; 10 for \$1.20;
2 yr., 20c each; 10 for \$1.50.

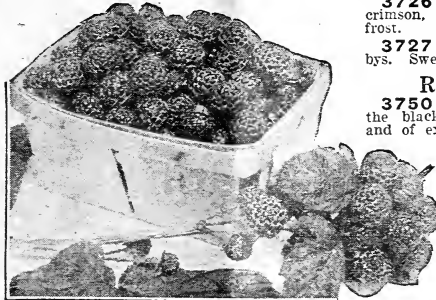

3778 Agawam. One of the best of all red varieties. Quite large, very rich in flavor.

1 yr., 15c each; 10 for \$1.20;
2 yr., 20c each; 10 for \$1.50.

3779 Niagara. Greenish white, heavy yielder. Bunches large and compact. Most satisfactory of all white grapes.

1 yr., 15c each; 10 for \$1.20;
2 yr., 20c each; 10 for \$1.50.

Special Grape Collections. 2 Moore's, 2 Niagara, 2 Agawam, 4 Concord, \$1.45, postpaid. 2 year size. Same collection in one year size, 95c, postpaid.

3726 St. Regis or Everbearing Red. Brilliant crimson, good size, ripens early; produces until frost.

3727 Cuthbert. Red. One of the old stand-bys. Sweet and very rich.

RASPBERRIES BLACK

3750 Cumberland is the best known of all the black-berries; a strong grower, heavy bearer and of excellent quality.

3751 Kansas. Earlier than the Cumberland. Large jet black berries. Heavy cropper. A great table berry. Moderately juicy, good flavor.

3752 Plum Farmer. Moderately large berries, jet black and quality excellent. Fine for eating, canning, and marketing. Vigorous grower, good yielder.

Prices postpaid. Strong transplants, 15c each; 10 for \$1.25; 50 or more, 10c each.

CURRENTS

3765 Cherry is a very deep red, large, rather acid, but fine for jelly.

3766 Fay's Prolife is not so red, bunches very large; is very productive.

3767 Improved Perfection is a cross between Fay's Prolife and White Grape. A beautiful bright red.

3768 White Grape, the best of white varieties.

GOOSEBERRIES

3770 Downing is a more compact grower, berries green and very large; for dessert and canning.

3771 Houghton is the strongest grower, a good annual bearer, fruit of fair size.

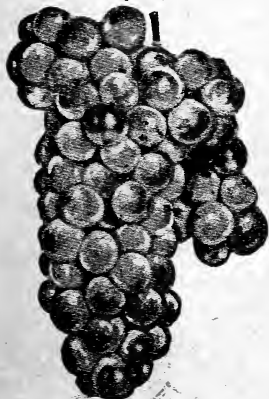

Gooseberries and Currants postpaid, 25c each; 10 for \$2.00; 25 or more, 18c each.

Note.—Many states have different laws concerning shipments of Currants and Gooseberries. If your state should have special regulations we will ship your stock from nursery connections in your section.

BERRY'S INSECTICIDES

Black Leaf 40. A nicotine sulphate solution for soft bodied sucking insects. Not mailable. 1/2 lb., \$1.20; 2 lbs., \$3.40.

Slug Shot. Non-poisonous. Destroys potato bugs, currant worms, cabbage lice and worms. Dusted on. Mailable. Postpaid, 1 lb., 25c; 5 lbs., \$1.00. Not prepaid, 5 lbs., 75c; 10 lbs., \$1.25; 50 lbs., or more, 11c per lb.

Low Prices Made Lower REAL FEATURE OFFERS

DOLLARS SAVED On Fruit and Shade Trees

Our Fruit Trees are extra selected stock. Grown only 25 minutes' drive from our Seed House. Hundreds of acres of all kinds of nursery stock to select from and under Supervision of Horticulturist from the State Department that makes the stock you buy free from disease; and another feature: your nursery stock does not make two or three trips before you get it.

GUARANTEE

We guarantee that our stock will reach the purchasers alive and in a growing condition.

SIZES

We offer all our fruit trees in two sizes. The mail size are 1 year trees on 2 year old roots, 3 to 4 feet. The Express are 2 year old trees on 3 year old roots and are 4 to 5 feet high.

SUMMER APPLES

3500 Red June. Early bearer, hardy. Red. Medium size. High flavor.

3501 Yellow Transparent. Flesh white, juicy and fine grained. Very fragrant when fully ripe. Fine for eating or table. Ripens in August.

3502 Duchess. Early, very hardy, red striped, juicy, the very best quality for cooking.

3503 Maiden Blush. A large apple with a beautiful blush on side. A pleasant sub-acid flavor and a valuable apple.

WINTER APPLES

3510 Delicious. This apple commands the highest price in the market. Fine grained, crisp and juicy, sweet slightly touched with acid. Equal to the best. The best eating apple.

3511 Grimes Golden. Early annual bearer. Yellow, crisp, spicy, sub-acid.

3512 Jonathan. A red apple; fine for winter. Tender and juicy.

3513 Stayman Winesap. Dark rich red; flesh firm and crisp. Exceedingly juicy and tender. Bears young.

CRAB APPLES

3520 Red Siberian. Small, used for jelly and pickles. Showy red; vigorous and hardy. August to September.

3520 Red Siberian. Small, used for jelly and pickles. Showy red; vigorous and hardy. August to September.

PEACHES

3574 Champion. Very hardy. Creamy white skin, red cheeks; freestone. Ripens about two weeks before the Elberta.

3576 Elberta. The great market peach of the Southwest. Very large, yellow with red cheek.

3575 Crawford early. (Freestone.) Best early market. Fruit very large. Color yellow, juicy and fine flavored.

3577 J. H. Hale. Like Elberta, but earlier.

PRICES ON APPLES AND PEACHES

MAIL SIZE—Postpaid. 35c each; 4 trees for \$1.00; 10 trees \$2.25; 25 or more 20c.

EXPRESS SIZE—Not Prepaid. 50c each; 4 trees for \$1.75; 10 trees \$4.25; 25 or more 40c.

CHERRIES

3550 Early Richmond. Very productive. Medium sized, bright red and very juicy. Very hardy. Ripens in June.

3551 Large Montmorency. Large; about 10 days later than early Richmond.

3552 English Morello. A large variety. Tree dwarf and slow grower. Very hardy and productive. Fruit large, very dark red, almost black; an enormous yielder. July and August.

PEAR

3600 Bartlett. Very popular, large; melting, rich flavor.

3601 Kieffer. Yellow with red cheek where exposed to sun. Flesh white, juicy and rich. Late keeper, very hardy.

PLUM

3625 Waneta. One of the new Hansen Hybrids, and the best one of the list. Two inches in diameter; reddish purple; wonderful quality, early bearer and hardy anywhere.

3626 Terry. Very large, high quality, hardy anywhere and sure to bear.

3627 Sapa. A rich purple. One of the best Hansen hybrid cherry varieties. Bears early, yields well. Extremely early.

3628 Underwood. A new variety. Large roundish oval shape fruit; color red. Juicy flesh. Ripens early and continues over a long period.

PRICES ON PLUMS, PEARS AND CHERRIES

MAIL SIZE—Postpaid. 40c each; 3 for \$1.00; 10 or more 30c each.

EXPRESS SIZE—Not Prepaid. 60c each; 4 for \$2.20; 10 or more 50c each.

APPLE COLLECTION. Eight trees. \$1.75 postpaid. Two collections for \$3.35. One year stock on two year roots. This is a day. One Red June, one Yellow Transparent, two Delicious, two Jonathan, two Grimes Golden. All high grade stock offered at a real bargain price.

CHERRY COLLECTION. Six fine trees for \$1.65 postpaid. Two collections for \$3.25. Sturdy one year trees on two year roots. Friends, here is a collection nearly everyone should have.

Excellent varieties. Fine quality at a money saving price. They come into bearing surprisingly soon. Start them now. Fine, healthy, vigorous stock, 2 fine early Richmond, 2 large Montmorency, and 2 English Morello.

PEACH COLLECTION.

Six trees for \$1.30, postpaid. Two collections for \$2.45. Hardy healthy one year old trees on two year old roots. Collection consists of 2 J. H. Hale, 2 Elberta, 1 Champion, and 1 Crawford. All of our regular hardy stock. These six trees if bought separately at our regular price would cost you \$2.10 and many places would charge you more. No gifts on collections.

SHADE TREES

2823 Mountain Ash. European. 4-5 ft. branched. 75c each; 5 for \$2.00. 5-6 ft. branched. \$1.00 each; 5 for \$4.00. 6-8 ft. branched. \$1.50 each; 5 for \$6.00.

2824 Bechtel's Flowering Crab. 18-24 in. 60c each; 5 for \$2.50. 2-3 ft. 75c each; 5 for \$3.00. 3-4 ft. \$1.25 each; 5 for \$5.00.

2825 Catalpa Bungei. 2 yr. heads, 3 ft. stems, 85c each; \$1.60 for 2 yr. heads, 4 ft. stems, \$1.00 each; \$1.90 for 2 yr. heads, 5 ft. stems, \$1.35 each; \$2.50 for 2 yr. heads, 6 ft. stems, \$1.65 each; \$3.60 for 2.

2828 Maple, Hard or Sugar. 6-8 ft. \$2.00 each. 8-10 ft. \$2.75 each.

2829 Maple, Soft. 5-6 ft. 40c each; 6-8 ft. 75c each; 8-10 ft. \$1.25 each.

2830 Poplar, Lombardy. 5-6 ft. 40c each; 10 for \$3.50. 6-8 ft. 75c each; 10 for \$6.50. 8-10 ft. 90c each; 10 for \$8.00.

2831 Poplar, Carolina. 5-6 ft. branched 25c each; 10 for \$2.00. 6-8 ft. wall branched 40c each; 10 for \$3.50. 8-10 ft. wall branched 60c each; 10 for \$5.50.

2827 Birch, Cutleaved. 5-6 ft. \$3.50 each; 6-8 ft. \$4.00 each.

Berry's American Certified Strains BABY CHICKS

**Pure Bred Fowls—Hatching Eggs—
Poultry Supplies**

5000 Chicks FREE

Every customer participates in these FREE CHICKS. We add extra chicks to every shipment. The more chicks you buy the larger number of FREE CHICKS you receive. We figure that in a course of a year's delivery we give away absolutely free not less than 5,000 chicks.

BERRY'S POULTRY FARM

We have been in the chicken business over a quarter of a century. Started away back before chick shipping was heard of. In those days we sold thousands of hatching eggs and breeding stock. Today we are still shipping mature fowls and hatching eggs aside from thousands of Baby Chicks.

We are members of the International Baby Chick Assn. and also members of the U. S. Chamber of Commerce. You are fully protected.

If you are looking for an honest to goodness Square Deal in your poultry and chick purchases insist on Berry's Certified Strain. We have your interest at heart. Our business is conducted on a "money back" guarantee plan. You take no risk. Our references and Guarantee protect you. American Certified flocks are culled vigorously by our licensed poultry expert. Our chicks are hatched in the very latest modern incubators that produce the big fluffy chicks that can be raised under normal conditions. Our chicks were prize winners even after shipping them across a couple of states. This speaks well for the vitality and quality. We can fill any size order, and every order is given our personal attention no matter how small or how large. We certainly solicit your orders and correspondence. Address: Berry's Poultry Farm, Dept. 23, Clarinda, Iowa, for best service and the Nation's Great Poultry Manual. It is free.

CHICK PRICES

Place your order before March 1st, and be protected on these low prices. Send deposit to suit your convenience with your order and deliveries will be made at your request any time after February 1st.

Gallons of GAS

THINK OF IT! FIVE HUNDRED FIFTY-NINE MILES OVER ROUGH MOUNTAINOUS COUNTRY BURNING ONLY ELEVEN GALLONS OF GASOLINE. IMAGINE MORE THAN FIFTY MILES TO THE GALLON. THIS IS WHAT THE WHIRLWIND-CARBURETING DEVICE DOES FOR D. R. GILBERT, ENOUGH OF A SAVING ON JUST ONE TRIP TO MORE THAN PAY THE COST OF THE WHIRLWIND.

THE WHIRLWIND SAVES MOTORISTS MILLIONS OF DOLLARS YEARLY

Whirlwind users, reporting the results of their tests, are amazed at the results they are getting. Letters keep streaming into the office telling of mileages all the way from 22 to 59 miles on a gallon, resulting in a saving of from 25% to 50% in gas bills alone.

Mark H. Estes writes: "I was making 17 miles to the gallon on my Pontiac Coupe. Today, with the Whirlwind, I am making 35 5/10 miles to the gallon. Am I glad I put it on? I'll say so!"

P. P. Goerzen writes: "I made an actual test both with and without a Whirlwind, getting 13 1/2 miles without and 34 6/10 miles with the Whirlwind, or a gain of 21 miles to the gallon. The longer the Whirlwind is in use on the machine the better the engine runs, has more pep and quicker starting. It makes a new engine out of an old one, and starts at the touch of the starter button."

R. J. Tulp: "The Whirlwind increased the mileage on our Ford truck from 12 to 26 miles to gallon and 25% in speed. We placed another on a Willys-Knight and increased from 12 to 17 miles per gallon."

Arthur Grant: "I have an Oakland touring car that has been giving me 15 miles to the gallon average, but I can see a great difference with the Whirlwind, as it climbs the big hills on high and gives me better than 23 miles to the gallon of gas, which is better than 50% saving in gas."

W. A. Scott: "I had my Whirlwind for three years. Winter and summer it gives the same perfect service, instant starting, smoother running, and what I have saved in gasoline these last few years has brought other luxuries which I could not have afforded previously."

Car owners all over the world are saving money every day with the Whirlwind, besides having better operating motors. Think what this means on your own car. Figure up your savings—enough for a radio—a bank account—added pleasures. Why let the Oil Companies profit by your waste? Find out about this amazing little device that will pay for itself every few weeks in gas-saving alone.

FITS ALL CARS

In just a few minutes the Whirlwind can be installed on any make of car, truck or tractor. It's actually less work than changing your oil, or putting water in the battery. No drilling, tapping or changes of any kind necessary. It is guaranteed to work perfectly on any make of car, truck or tractor, large or small, new model or old model. The more you drive the more you will save.

SALESMEN AND DISTRIBUTORS WANTED

Free Sample and \$100.00 a Week Offer

Whirlwind men are making big profits supplying this fast-selling device that car owners cannot afford to be without. Good territory is still open. Free sample offer and full particulars sent on request. Just check the coupon.

WHIRLWIND MANUFACTURING CO.

**"I Went
Broke
Farming
But"**

The McNess Business put me on 'Easy Street'

C. C. Butler was a farmer who went broke when the slump came. Then the opportunity came to him as it now comes to you. He heard how he could change his car into a McNess Chain-Store-On-Wheels and he is today making more money than he ever did on the farm.

Use Your Car to Raise Your Pay

You can do the same as Butler. We will gladly tell you how to make more money by using your car as a McNess Chain-Store-On-Wheels. Work is easy, interesting, healthy and profitable. We can help you start a good year 'round business that will bring you a good steady income for life.

You Will Make Money From the Start

The McNess Chain-Store-On-Wheels will pay any man who will work a profit of \$35 to \$50 a week at the start. Profits grow to \$100—\$150 and sometimes even more when business is established. You can make more real money than you have ever made before, and you'll enjoy the work too.

FURST & THOMAS Dept. S-C, Freeport, Ill.

Gentlemen: I have a car and am interested in servicing homes with McNess' Products. Send full details.

Use Our Capital to Start

You do not need a lot of money to start. We furnish deserving men the use of our capital without interest. This makes it easy to start and easy to make money while using our money.

Biggest Business of Its Kind

The McNess Business is biggest on the road. There are five big lines in one—the Brush Line—the Household Preparation Line—the Toilet Article Line—the Food Product Line and Stock and Poultry Supply Line. Every farmer needs some of the high quality products you carry in the McNess Chain-Store-On-Wheels.

Big Bargains Offered

You will have over-sized packages of first quality products—big bargains to offer—premiums to use—samples to give and cookbooks, folders and other advertising to distribute free and help you get business.

No Experience Needed

The most successful McNess dealers never sold anything before. So don't hesitate a minute because you have not had selling experience—we help you and guide you. Use your car and our capital to put yourself and family on "Easy Street." Write today for full particulars.

Aluminum Roaster and Percolator

This is the famous Princess ware 20 gauge aluminum set. The overall dimensions of the roaster 17x10x3 in. Just the right size for ordinary home use. Closes tightly, rolled rims, sanitary. Percolator is a 2 quart size. It is equipped with flame guard on handle, and spreader cover on coffee basket. You receive both the roaster and the percolator securely packed on an order for \$100.00 or more.

A Gift on Every Order

The sensationally low prices that we have made in this great 35th Anniversary Sale are in themselves sufficient inducement to send us your order. We want to go further than that in order to have the opportunity of getting started to trading with new customers. We know that the quality of our seeds will make you a permanent customer. Therefore we offer these gifts free to every new customer.

How Gifts Are Awarded

Every order at regular catalog prices for \$1.00 or more is entitled to one of these free gifts. No gifts are awarded on special quotations or specially priced collections. You select the gift you want but there is only one gift to an order. For example, on a sixty dollar order you are entitled to the Princess Aluminum percolator but not to the percolator and thermometer both.

How to Get Best Gifts

If you want the 42 piece dinner set but your order is not large enough, call on your neighbors, and make up a \$250.00 club order. Send the order in your name, and the dinner set is yours. You may be an old customer and by getting new business you can secure one of these anniversary gifts.

of Rectal and Colonic Diseases*

A Treacherous Affliction Healed Without Surgery

THE old theory that surgery was the only method by which hemorrhoids (piles) could be successfully treated has been wholly disproved. If taken in time, this treacherous affliction, which slowly but surely undermines the health of its victims, can be healed without recourse to surgical aid.

As pioneers in the non-surgical treatment of hemorrhoids (piles), Dr. McCleary and his associates have established a wonderful reputation for their skill in treating all curable Colon and Rectal conditions. Their services have been sought by men and women from every state, from Canada, Cuba, Mexico and other foreign countries. Their reference list now contains the names of over 19,000 persons, including business men and women, farmers, bankers, teachers, ministers, in fact those from every vocation in life.

The McCleary treatment finds favor with men and women, young and old, for it entirely does away with harsh surgical methods of treating hemorrhoids or piles. All the discomfort and dangers of ether and chloroform have been eliminated.

Illustrated Book FREE!

We have just prepared a new book describing the McCleary treatment which is fully illustrated, printed in colors and copyrighted at Washington. It explains in a very interesting and instructive manner the various kinds of hemorrhoids (Piles) and other rectal troubles and the mild McCleary treatment which has proved so successful. A copy of this book will be sent postpaid, free to anyone. Send your name and address in a letter or postal. So confident are we of results that we say to one and all alike, "If our treatment for your rectal trouble should not prove successful, you do not owe us one cent."

Are you one of the hundreds in every community who suffer from rectal trouble? If so, you should not delay. We are pleased to refer you to any of our former patients. Ask them about their experience here.

If you desire you may write us describing your case as accurately as possible. Your letter will be kept in strict confidence and you will be answered promptly. Our book and large reference list will be sent free postpaid in plain wrapper.

These Symptoms Are Warnings

Nature sets up danger signals to warn us. If these warnings are heeded in time much suffering and often grave danger can be avoided. If you have been troubled with headaches, nervousness, faulty nutrition, stomach and liver troubles, constipation, etc., and have been unable to overcome them, you should write at once for Free Book and learn if your symptoms are not due to some rectal or colonic trouble.

GRAPE COLLECTION

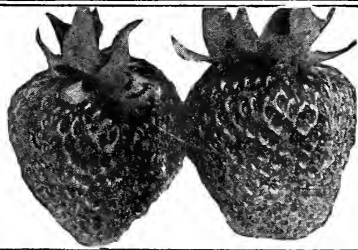

10 Vines, \$1.45 Postpaid. 2-year size. Same collection in one-year size, 95c Postpaid.
This Collection is composed of big, healthy vines. 2 Moores, 2 Niagara, 2 Agawam, and 4 Concord. A few good grape vines soon bear an abundance of delicious fruit. You can set them along the side or end of the garden. Thus they do not occupy much space. Grapes can be used in so many different ways that no family should be without a plentiful supply. It is surely fine to have some different varieties in your garden maturing at different times. This gives you different flavors as well. Save money on this fine collection. (No Gifts on collection orders.)

MASTODON STRAWBERRIES

A wonderful new Everbearing Strawberry. Enough cannot be said for it. Under ordinary culture it has produced at the rate of 350 16-quart crates per acre the same year it was planted. Its great size and luscious flavor are greatly in its favor on the market. It will bring far better prices than the older everbearers because of its beauty and enormous size.

Postpaid—25 plants for 90c;
50 plants for \$1.40; 100 for \$2.45. Not postpaid—200 for \$4.00; 500 for \$7.50; 1,000 for \$13.95.

RED GOLD STRAWBERRIES

Red Gold is a revelation in spring varieties. It is enormous in size. Some of these measure eight inches around. Color is shining red. They do not contain the acid found in common varieties. Requires less sugar and are called the preserving berries. Fruiting season thirty days. The Red Gold is truly a wonderful variety. It is in a class by itself in the spring bearing type. Everyone who likes strawberries should by all means have some Red Gold in their garden.

Postpaid—12 for \$1.00; 25 for \$1.75; 50 for \$3.00; 100 for \$5.00.
